Instruction manual

XT-09S

Wireless Remote Instruction

- Long press camera button of the remote for about 3 seconds, indicator light will flash and remote enter into pairing mode.
- Turn on your cell phone's wireless function, search for "Xiong Tu" and pairing, indicator light off.
- Turn on your cell phone's camera APP, and click the camera button on the remote for selfies

NOTE:

- The effective distance of wireless remote control is within 33ft
- We suggest to turn off the remote if not using it for a long time. Long press the camera button for about 5 seconds, indicator flashes three times and then off, the wireless remote has been shut off.
- If there is no operation with the wireless remote for a long time after successful pairing, it will enter into sleep mode. Click the camera button to activate.
- Disassembling the battery cover yourself to replace battery of remote if it ran out of battery

Selfie Stick Instruction

Connect cellphone and remote by wireless

Adjust the extension pole to the appropriate length (11.02-27.2in)

Rotate phone clamp angle (360 degree rotatable phone clamp)

Mount your cellphone (compatible with smart phones width up to 3.15in).

Adjust the rotation knob angle can be adjusted forward and backward within 225 degree

NOTE:

- Best to keep the center of gravity of the phone consistent with the product.
- The lower the height, the better the stability.

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause unintended operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15.07 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installations. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
