X1 can use in computer-supported Bluetooth technology to talk with others through network communication such as iSkepe and other messenger sites.

SCHEMATIC OF X1 BLUETOOTH WIRELESS HEADPHONE:

1

BATTERY INFORMATION:

You device is powered by a rechargeable battery. The battery can be charged and discharged hundreds of times, but it will eventually wear out.

Unplug the charger from the electrical plug, and the the device when not in use. Do not leave a fully charged battery connected to a charger, since overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time. Never use any charger that is damaged.

Leaving the device in hot or cold places, such as in a closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. Always try to keep the battery between 15C and 25C.

A device with a hot or cold battery may not work temporarily, even when the battery is fully charged.

2

Blue flashes once every 10 seconds: **Connected standby mode**

Red flashes twice every 30 seconds: **Low battery warn**

Solid red light : **Charging**

Red LED turn out : **Full charging**

CHARGING THE BATTERY AND LOW BATTERY WARN:

Connect the charger with USB charging cable to the headset, the LED turn red while charging, the LED will turn out after 1-2 hours after battery is fully charged.

When the red LED flashes twice every 30 seconds and will warn every 30 seconds to show that the battery runs out, the battery need to charging again. If using 5-10 minutes continually, the headset will power off automatically.

TROUBLE SHOOTING

If you cannot connect the headset to your phone, do as follow:

1. Ensure that the headset is charged, switched on, and paired with and connected to your phone.
2. Ensure that the Bluetooth feature is activated on your phone.
3. Check the headset is within 10 meters of your phone and that there are no obstructions between the headset and the phone, such as walls or other electronic devices.

5

Battery performance is particularly limited in temperatures well below freezing.

Do not dispose of the batteries in a fire as they may explode, Batteries may also explode if damaged.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
