## ATTENTION !

### For the first time use:

Clean your SGUAI Smart Water Bottle with soap and hot water before first use.

Please dry the water stains and ensure that the bottom of the bottle and the surface of the coaster are dry to avoid damage.

Activate the bottle by connecting it to the charging coaster, and make sure the phone Bluetooth has been turned on.

Download our free SGUAI app to discover its smart features. The app will guide you through the set up and installation.

### In use

#### Avoid falling and touching

Avoid heavily impact, damage and replaced the part by yourself.

#### Clear excess water

When the bottle is idle for a long time, remember to pour out the remaining water in the bottle.

Android/Apple users must meet the following conditions when binding a water cup: the phone's hardware supports Bluetooth 4.0 or above; The Android operating system must be based on Android 8.0 or above; The iOS operating system must be based on 10.0 or above;

# CONNECT

Please ensure that your phone's Bluetooth is turned on

## Water Consumption Detection

You can track how much water you had through the APP[Device]-[Statistic] page, once you start following your water intake you will find that on the days when you reach your daily goal, you look and feel more energized.

Fill your bottle completely with water. Make sure the sensor stick is attached to the lid securely. Screw on the bottle lid and let sit on a flat stable surface for 10 seconds to calibrate.

Set down your bottle after every refill and drink. Remember to sync the app near the bottle each day so your water is tracked correctly.

## Water Drinking Reminder

You can access your settings through the APP[Device]-[Water Reminder] to enter the page. There are "smart reminder" and "Scheduled reminder" two kinds of drinking water reminder mode.

## Smart Reminder Mode

According to your actual water consumption, weight, activity level to design a scientific and reasonable drinking time, and through the flashing light to remind you to drink water.

Based on your last water drinking time, recalculate the next reminder time.

You can set 8 scheduled groups of drinking alarm (from 6:30AM to 22:30PM) to remind drinking regularly.

# CONNECT

Please ensure that your  
phone's Bluetooth is turned on

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
