Startup Guide

*The device adopts "three buttons" for navigation control by default. Click Settings > System Navigation to choose different navigation modes.

The device supports OTG function, please use standard OTG data line in order to ensure the normal use of this device.

STARTUP-GUIDE

Long press the power switch to turn on the device. You can perform basic Settings on the device according to the screen guide when it is powered on for the first time.

1. Choose the language and country based on your actual needs, then click start.

2. Search for available WLAN networks. If there are WLAN networks around, the system will automatically identify them. Click the one you need, and enter the correct password to connect to a WLAN. If there is no available WLAN network around or you do not want to connect temporarily, you can use mobile network or set the WLAN in offline mode. After the device is powered on, set WLAN network in Settings > Network and Internet.

3. After setting the date and time in offline state, click Next to enter the Google service interface, read the relevant content carefully, and accept the Google Terms of Service and Google Privacy Policy. You do not need to worry that your privacy will be leaked when using this device. We will keep your privacy strictly confidential.

4. For security, you are advised to set screen protection PIN code. If you do not want to set, click skip.

CONNECT TO WLAN NETWORK

1. Swipe down from the status bar to open the notification panel.

2. Long press [◇] to enter WLAN setting interface, detected networks will be listed here.

3. Click the WLAN network you want to connect to, if it is encrypted, you need to enter password to access.

HOW TO SWITCH PHYSICAL SIM CARD

1. Switch to use the SIM card: Tap Settings>Network and Internet, then turn off Cloud SIM, and then insert the SIM card to use it.

2. Switch to use Cloud SIM: Click Settings>Network and Internet, and then turn on Cloud SIM.

• Cloud SIM is used by default initially.

PHYSICAL SIM CARD INSERTION INSTRUCTIONS
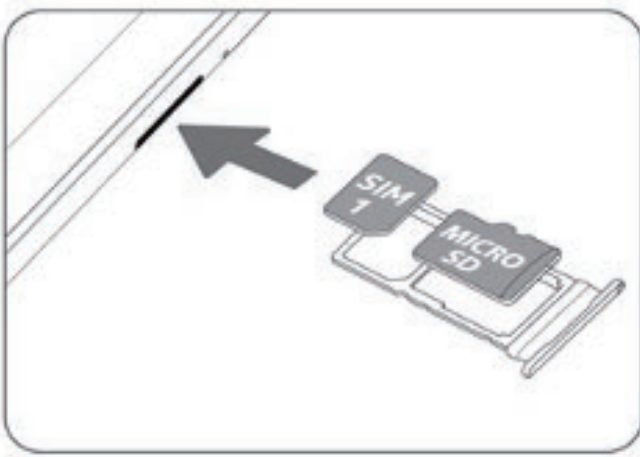

- Do not remove or insert SIM card when the device is on.

- When inserting the card, pay attention to the notch direction of the card and ensure it is installed to the SIM tray first.

- Use a standard Nano-SIM card. Inserting a non-standard card may damage the card holder (slot) or fail to recognize the card.

- If your SIM card does not match the device, please contact operator for help.

- When using the retrieve card pin, be careful to avoid poking your finger or damaging the device.

- Please keep your retrieve card pin well and out of reach of children to prevent them from ingesting accidentally or being stabbed.

CHARGING AND CAUTIONS

Connect the power adapter of the charger to the socket and the other end to the device for charging

• This charging diagram is for reference only.

• The charging voltage range of the device is AC 100V-240V, 50/60Hz.

It is normal if the device surface gets hot when charging or using for a long time.

1. The device is equipped with built-in battery, do not disassemble it without authorization.

2. Use the original power adapter of the device. Other power adapters may cause failure or permanent damage to the device.

3. Batteries should not be disassembled, short-circuited, squeezed, bumped, or exposed to fire.

4. Do not place the battery in an overheated (over 60 °C), damp, or corrosive environment.

5. Do not use the battery if it is soaked or swollen.

CHARGING AND CAUTIONS

Connect the power adapter of the charger to the socket and the other end to the device for charging

- This charging diagram is for reference only.

On-screen gesture

Control the icons, buttons, menus, keyboard and other items using your gestures.
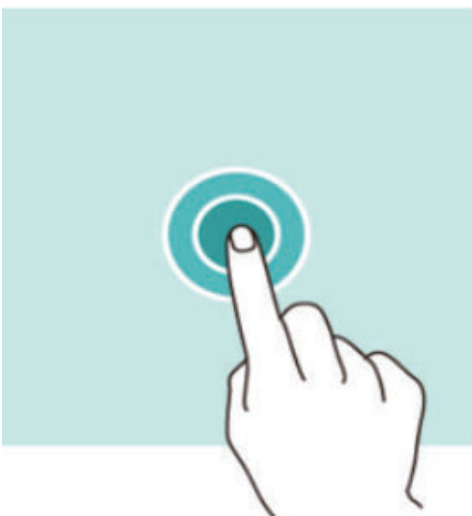

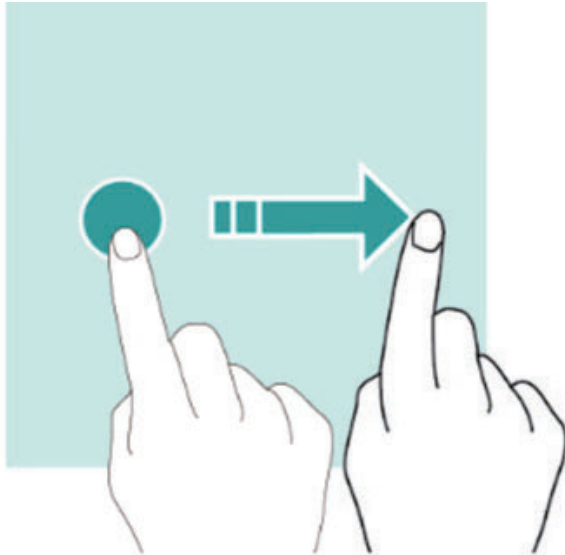

Tap

Touch one finger lightly on the screen once.
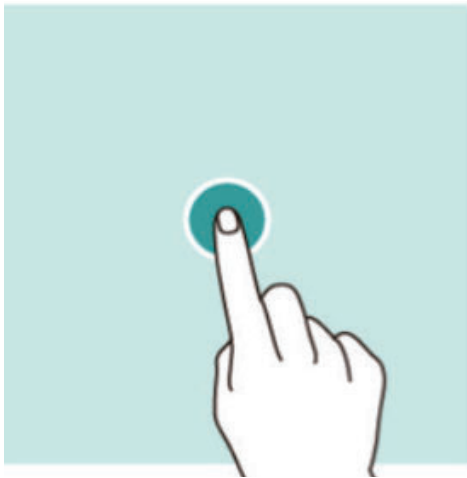

Touch and hold

Touch and hold items in screen or list area to enter edit mode or pop up menu.

Statements

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.
--Increase the separation between the equipment and receiver.
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
--Consult the dealer or an experienced radio/TV technician for help.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

SAR tests are conducted using standard operating positions According FCC standards with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

This model product has been tested and meets the FCC RF exposure guidelines with the test distance 0mm for body worn. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with exposure requirements, and should be avoided
