Subject: Requesting Class II permissive change for FCC ID: 2ALT9161301

To Whom It May Concern:

The purpose of this letter is to request a Class II Permissive change for FCC ID: 2ALT9161301, original granted on 06/20/2017

There is no other hardware or electrical modification made to the applying modular transmitter itself except below:

The major change filed under this application is installing the module in a portable configuration-a Notebook, the distance between antenna and human body is 8mm and the original module report the distance is 14mm. SAR testing was performed to demonstrate RF compliance.

The original antenna gain for BT/2.4GWIFI is 3.24dBi, antenna gain for is 5dBi. In the condition of this time, the antenna gain for BT/2.4G WIFI is 3.1dBi, WIFI 5G is 2.8dBi.

In the condition of this time, since it is client without DFS radar detection capability, detection threshold as set to the module remains identical, and would deactivated the link as it is operated with AP only, DFS test can be excluded.

Please contact me if you have any questions or need further information regarding this application.

Best Regards
