equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(f)).  6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.  (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC (identification number; and, if the FCC identification number is not visible when the modular transmitter must be labeled with its own FCC (identification number) and, if the FCC identification number is not visible when the module is installed must also slayly a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID. XYAMODEL!" any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.  (B) If the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular reassmitter or on the device in which it is installed. If the module is installed inside another device, then the ousside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can see wording such as the following:  "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The iour manual must include histractions on how to access the electronic display, a label referring to the enclosed module. This exterior label can be wording such as the following:  "Contains FCC certified transmitter module(s)." Any s		the case of the module and supporting	TOTAL STREET, THE STREET, THE	
or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)).  6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its PCC identification number.  (A) If sing a permanently affixed label, the modular transmitter must be labeled with its own PCC Identification number is not visible when the modular is installed inside another device, then the module is installed inside another device, then the module is installed inside another device, then the module is installed inside another device, then the workness of module. This exercise labeled on use wording such as the following: "Contains PCC ID. XYZMODEL!" any similar wording in the expresses the some meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must be included in the application for equipment authorization, or insust provide activate in the application for equipment authorization, and in the application of equipment authorization and the activity of the modular transmitter or on the device the which the module is installed must display a label referring to the enclosed modula. This exterior label can use wording such as the following:  "Contains PCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include unstructions on how to access the electronic display a label referring to the enclosed modula. This exterior label can use wording such as the following:  "Contains PCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include unstructions.  7 The modular transmitter must comply with any specific rules or operating requir				
module during testing shall be unmodified and commercially available (see Section 15.31(i)).  6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.  (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the modula is installed inside mother device, then the module is installed inside mother device, then the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following. "Contains FCC ID: AYZMODEL!." or "Contains FCC ID: AYZMODEL!." or "Contains FCC ID: AYZMODEL!." or "Contains FCC ID: AYZMODEL!." on with provide such a label, in expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization.  (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter use and electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter use and electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter uses an electronic display. A copy of these instructions must be included in the application for equipment authorization.  7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must				
ummodified and commercially available (see Section 15.3 (ij)).  6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.  (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and if the FCC identification number is not visible when the modular installed must also display a label reforms to the enclosed module. This exterior tobel can use wording such as the following. "Contains Transmitter Module. This exterior tobel can use wording such as the following." Contains Transmitter house the revoke acquired instructions along with the module which explain this requirement. In the latter case, a copy of these instructions along with the module which explain this requirement. In the latter case, a copy of these instructions with the module of the application for equipment authorization.  (B) If the modular transmitter isses an electronic display of the FCC identification number, the information must be included in the application for equipment authorization.  (B) If the modular transmitter on the device into which it is installed must display a label referring to the neclosed module. This exterior tabel can use wording such as the following:  "Comains FCC certified reansmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A capy of these instructions must be included in the application for equipment authorization.  The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must		,		
(see Section 15.31(i)).  The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.  (A) If using a permanently affixed label, the modular transmitter must be tholeded with its own FCC identification number, and, if the FCC identification mumber is not visible when the modular is installed must also display a label referring to the enclosed module. This exterior table can use wording such as the following. "Contains TCC ID: XYXMODEL!" or "Contains FCC ID: XYXMODEL!" and yas minlow wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization. or, unsar provide adequate instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification mumber, the information must be readily accessible and visible on the modular transmitter use and evidence in which it is installed instead mother device, the the custade of the device into which the module is installed must adapted a took in the module to installed instead mother device, the the custade of the device into which the mediale is installed must adapted a took in the module is installed mist another device, the the custade of the device into which the mediale is installed mist another device, the neclosed module. This exterior table can use wording such as the following:  "Contains FCC certified transmitter module(s)."  "Any similar wording that expresses the same meaning may be used. The access the electronic display. A copy of these instructions must be included in the application for equipment authoritation.  The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must				
The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.  (A) I using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and I the FCC identification number is not visible when the module is installed must also display a label referring to the enclosed modular. This exterior label can use wording such as the following: "Contains FCC ID: XYMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may with the module which explain this requirement. In the latter case, a copy of these instructions what be included in the application for equipment authorization.  (B) If the modular transmitter see an electronic display of the FCC identification number, the information must be included in the application for equipment authorization of the device into which the module is installed must slapply a label referring to the enclosed module. This exterior label can use wording such a slapel of the following: "Contains FCC lifeutification number, the information with the module which explain this requirement. In the latter case, a copy of these instructions unsate be included in the application for equipment authorization.  (B) If the modular transmitter or on the device into which the module is installed must slapply a label referring to the enclosed module. This exterior label can use wording such as the following:  "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user momand must include instinctions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization.  The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must		•		
equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.  (A) If sing a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC Dt. XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Souther with the module which explain this requirement. In the latter case, a copy of these instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.  (B) If the modular is masmitter sea ne electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following:  "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display, A copy of these instructions must be included in the application for equipment authorization.  The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must		<u> </u>		
affixed label or must be capable of electronically displaying its FCC identification number.  (A) If sing a permanently effixed label, the modular transmitter must be tabeled with its own FCC identification number, and, If the FCC identification number is not visible when the module is installed insted another device, then the outside of the device into which the module is installed must do slighty a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: XYZMODEL!" or "Contains FCC identification mumber, the information on most or electronic display a label referring to the enclosed module. This exterior label can subscided of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can sewording such as the following:  "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The near manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application f	6	The modular transmitter must be	<ul> <li>Interpretation of the control of the c</li></ul>	Y
electronically displaying its FCC identification number.  (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module. This exterior label can use wording such as the following: "Contains Transmitter Module. This exterior label can use wording that expresses the same meaning may be used. The Grantee may either provide such a tabel, an example of which must be included in the application for equipment authorization, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.  (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following:  "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display, A copy of these instructions must be included in the application for equipment authorization.  The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must		equipped with either a permanently		
identification number:  (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification mumber; and, if the FCC identification mumber is not visible when the module is installed misted earother device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.  (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior tabel can use wording such as the following:  "Contains FCC certified transmitter module(s)."  Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization.  The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must		affixed label or must be capable of	label information.	Autority and
identification number:  (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification mumber; and, if the FCC identification mumber is not visible when the module is installed misted earother device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.  (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior tabel can use wording such as the following:  "Contains FCC certified transmitter module(s)."  Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization.  The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must		electronically displaying its FCC		
(A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number, and if the FCC identification number is not visible when the module is installed misted another device, then the outside of the device into which the module is installed must also display a fabel referring to the enclosed module. This exertior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL! To "Contains FCC ID: XYZMODEL! Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.  (B) If the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed must display a laber referring to the enclosed module. This exterior label can use wording such as the following:  "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user namual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization.  The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must				
modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!." Any similar wording that expresses the same meaning may be used. 	requirements in its final configuration.	

A limited modular approval may be granted for single or split modular transmitters that do not comply with all of the above requirements, e.g., shielding, minimum signaling amplitude, buffered modulation/data inputs, or power supply regulation, if the manufacturer can demonstrate by alternative means in the application for equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the operating conditions in which the transmitter will be used. Limited modular approval also may be granted in those instances where compliance with RF exposure rules is demonstrated only for particular product configurations. The applicant for certification must state how control of the end product into which the module will be installed will be maintained such that full compliance of the end product is always ensured.
