## 1. Remove Lens

Hold these two points and push down

Pulled away from fastener

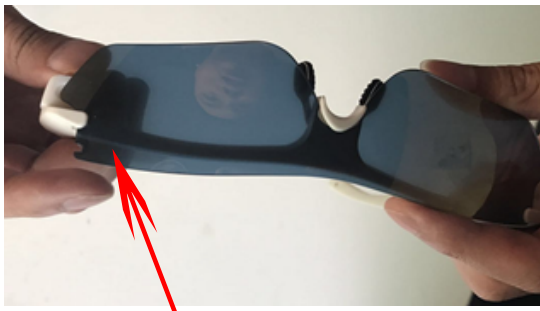

## 2. Mount Lens

Stick into this slot first

Push into this fastener

Stick into this slot

## Q&A

1. If 'not found the equipment' occurs, please quit the APP and restart. If bind failed again, check as follows:

- ① Check whether the smart glasses has been turned on.
- ② Check if the smart glasses has been bound to any other phone, try again after unbond.
- ③ If you have paired your mobile phone with your smart glasses before, please unpair them firstly. Open Show in Show again to search and bind.
- ④ If you fail to bind after above operations, reboot your smart glasses or the phone Bluetooth and try again.

2. Phone calls can't be transferred to smart glasses:

Check if the smart glasses has been bound to your mobile phone and make sure 'Bluetooth Calls' in Show in Show is open.

3. Once bound, calls will be answered through smart glasses. If you want to answer calls by phone, you can shift it on your phone when you are at a call. You can also set in Show in Show in 'Setting — Bluetooth Calls' .

4. When taking a photo or recording a video, the voice hint 'Video Monitoring': Exam if the memory space is full. If the memory space is full, please download the photos and videos to your phone, pad, computer first, then delete the photos and videos in your smart glasses to restore memory space.

5. Standby time is short:  
Please turn off Wi-Fi connection of your smart glasses when LIVE not in use. Turn off Wi-Fi connection in 'Settings — WLAN Sync'.

## **FCC Caution.**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
