

BLUETOOTH[®] FM TRANSMITTER

USER'S MANUAL
Model: VM-207

1

thank you for choosing VM-207 Bluetooth FM Transmitter. This product is designed and built with high-performance Bluetooth module and audio decoding chip. Not only it can connect the music from the mobile phone to the car stereo through Bluetooth, it can also play music files in U disk and transmit it to the car stereo wirelessly. Built in hands-free phone calls system switches between music and incoming calls seamlessly and enables you talk on the phone freely during your driving. What's more, this Smart FM transmitter is equipped with multi-functions which are controlled by an APP, here are what you could do with this APP: 1. Set frequency to match with the radio 2. Monitor the battery voltage of your car 3. Automatically record where your car is parked and help you locate your car. This product works by means of wireless transmissions, so you can keep the original classic setting of your car and still enjoy music on the road.

 Bluetooth Version: V5.0+EDR
 Audio Frequency: 20H~20KHZ
 Working Current: 60mA(Max)
 Stand-by Current: 30mA(Max)
 Bluetooth Working Frequency: 2402~2.480ghz
 Bluetooth Effective Distance: 32ft

FM Emission Effective Distance: 6ft
 Sensitivity:-89dBm
 RF Output:4dBm
 FM Frequency: 88.1MHz-107.9MHz
 Transmitting Power:87dBuV/107dBuV

FCC Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

7

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
