- 9 Remove the VHB protective film on the underside of the device, and press firmly against the mounting surface for 30 seconds to maximise adhesion.

**Note:** VHB adhesive will reach maximum bonding strength after 24 hours.

- 10 For an alternate secure mounting method, mount the device using a cable tie to the desired fixture, or connect to keyring as pictured below:

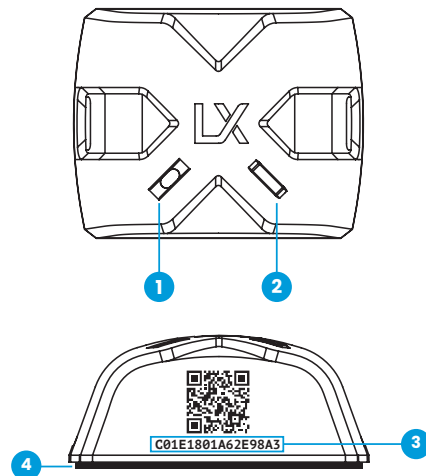

#### Safety and compliance

Ensure installation complies with all relevant local regulations and requirements.

#### Troubleshooting

Visit [incyt.io/support](https://incyt.io/support) for further installation, activation and trouble-shooting information.

#### Product Overview

- 1 Environmental Sensing Port (Lyra Sense model only)
- 2 LED
- 3 Device ID
- 4 VHB Tape

Lyra  
Quick Start Guide

#### LYRA QSG

Finished Size	75mm W x 115mm H
Stock	120gsm satin paper, print 2 sides
Colour	Full colour CMYK
Finish	Double sided, single fold, folded to size
Embellishments	None

CMYK: 84, 21, 0, 0  
RGB: 0, 152, 219  
HTML: 0098DB  
PMS 2925 C (coated)

## Getting Started

- 1 Download the Incyt by LX app on the iOS AppStore, or Google Play store on your mobile device.

- 2 Create a new account or login with your existing account.
- 3 Follow instructions in the app to pair your device.
- 4 Follow the instructions on the next page to activate and mount your device.

## Device Activation

The device is delivered in a dormant state. Activate before use by completing the following steps:

- 5 Place the device in range of the Bluetooth equipped smartphone to be connected to. Ensure the Incyt app is installed, and Bluetooth is turned on.
- 6 Use the magnet included in the box to swipe over the LED on the device. The LED will start pulsing yellow.

Swipe a second time within 5 seconds. The LED will remain on for 3 second, indicating successful activation.

**Note:** If the LED turns ON for 1 second after the first magnet swipe, the device has already been activated.

## Device Installation and Mounting

- 7 Select an appropriate location to mount your device. The most important factors to consider are:

### • Orientation

Lyra may be mounted in any orientation, however Lyra Sense must be mounted on a vertical surface to avoid sensor port blockage as below:

### • Temperature

The recommended temperature range of this device is 5°C to 50°C. Use outside of this range may limit the device performance and functionality, and may reduce the battery and operational life of

the device. We recommend you carefully consider these factors when installing.

### • Wireless network

This device uses Bluetooth technology for geo-location and communication with the Incyt platform. Installing the device in a location with unobstructed visibility to the Bluetooth receiver, such as a smartphone or the LX Antares gateway, will ensure maximum performance and accuracy of the device.

### • Exposure to Environment

Although this device is rugged, protecting it from direct sunlight, rain, chemicals, and dirt will extend its operational life. The environmental sensing port needs to be kept clean, dry and unobstructed to provide accurate sensor readings.

- 8 Roughen smooth surfaces using a scouring pad or steel wool before application. Clean the mounting surface prior to installation by removing debris, and wiping using the alcohol wipe included.

## FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition, compliance with exposure requirements.
