

Troubleshooting:

1. If the additional speakers do not connect to the 1st speaker or you do not hear an audible beep sound when pairing the additional speakers, please double press the ON/OFF button on the additional speakers again.
2. If your device is an Apple product, make sure only 1 "UUFFOO" record is in the device list, otherwise, you will not be able to pair. To fix this, simply have your device "Forget this Device" on any additional "UUFFOO" devices leaving only 1.
3. This product has a memory storage function (if the batteries are not fully exhausted), when you turn on speaker, the light and speaker will maintain the same settings and pairing as the last time used. If the battery is exhausted there will be no memory storage function and you will need to pair the 1st speaker with the additional speakers.

Bluetooth Function:

1. Make sure battery is fully charged before attempting to connect the first time.
2. Starting with the 1st Tiki Torch, press and hold the Bluetooth ON/OFF button on the top of the speaker. There will be an audible activation beep and the indicator light will flash.
3. On your phone, turn Bluetooth to "ON" and select "UUFFOO" in your Bluetooth device list. Once device is connected you will hear a second audible beep from the speaker and the indicator light will be blue.
4. PAIRING: To connect with additional speakers (**the 2nd, 3rd...99th speakers**), quickly double press the **ON/OFF** button on each additional speaker. You will hear a beep sound from the additional speaker. Once paired, you should hear the music playing in a while. To cancel, the pairing, quickly double press the **ON/OFF** button. No beep will be heard when turning the speakers off.
5. To turn off the Bluetooth function, press and hold the **ON/OFF** button.

Battery Operation:

1. Please charge the battery fully before first use.
 2. Connect the USB adapter to the speaker using the charge port. While battery is charging the indicator will be red.
 3. Charge the battery until the indicator light is off.
 4. After the battery has been charged, turn on the speaker and the indicator should be blue. Press and hold the **Light ON/OFF** button at the top of the speaker to turn the Tiki Torch ON or OFF. Press the light ON/OFF button a 2nd time to have the light enter flicking flame mode. Then follow Bluetooth function instructions.
- Note:** The built-in battery is not replaceable. Please do not remove or replace it in the trash. If you must dispose of this speaker, bring it to your local recycling center.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
