Photo 19: Front side 15mm with cover opened	Photo 20: Back side 15mm with cover opened
 A close-up photograph of a black plastic mechanical component. The component has a flat top surface that is slightly angled. Below this surface, there are various internal structures, including a small rectangular slot and a larger, more complex assembly. A black knob or adjustment screw is visible on the right side of the component. The background is a plain, light-colored surface.	 A close-up photograph of the same black plastic mechanical component from a different perspective. This view shows the back side of the component. It features a similar top surface and internal structure as seen in the front view. A black knob or adjustment screw is prominent on the right side. The background is a plain, light-colored surface.
