### Aux in:

If your device doesn't support Bluetooth function, you can use the 3.5mm audio cable to connect your device with the product.

1. Use the 3.5mm audio cable to connect your device with the product.
2. Now it can transmit music from your device to car stereo.

### Aux out:

If you can't find a blank station, and there is too much noise , you can use the 3.5mm audio cable to transmit music through Bluetooth/micro SD card/U disk only if your car has aux in port.

1. Plug in your micro SD card/U disk, or pair the product with your Bluetooth enabled device.
2. Plug the 3.5mm audio cable into your car aux in port and the transmitter.
3. Now it can transmit music from your micro SD card/ U disk/Bluetooth enabled device to car stereo.

### FCC STATEMENT:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### Correct Disposal of This Product

 (Waste Electrical & Electronic Equipment) This making shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources. Household user should contact either the retailer where they purchased this product or their local government office for details of where and how they can take this item for environmentally safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
