

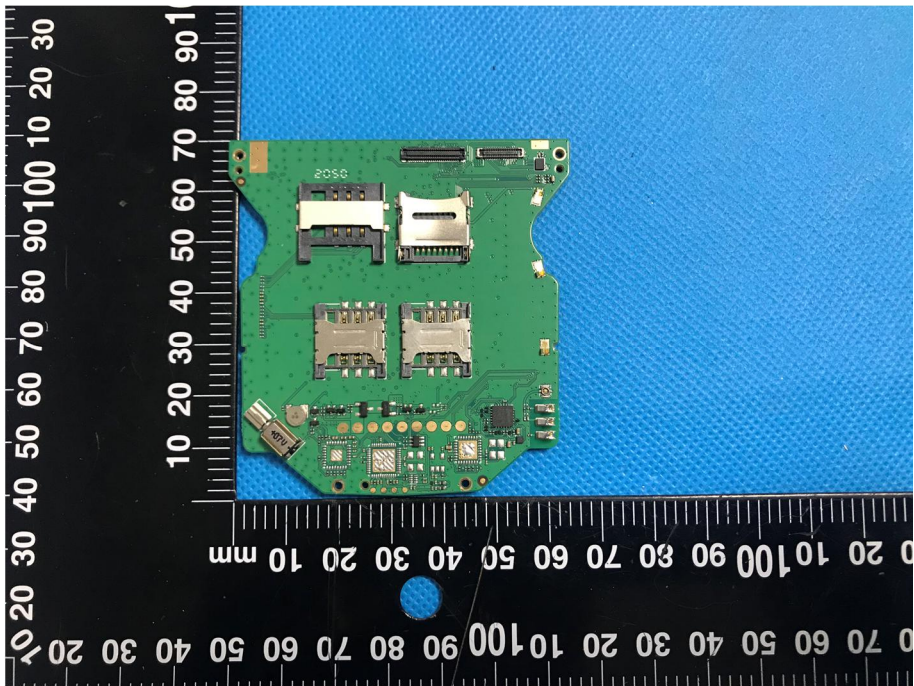

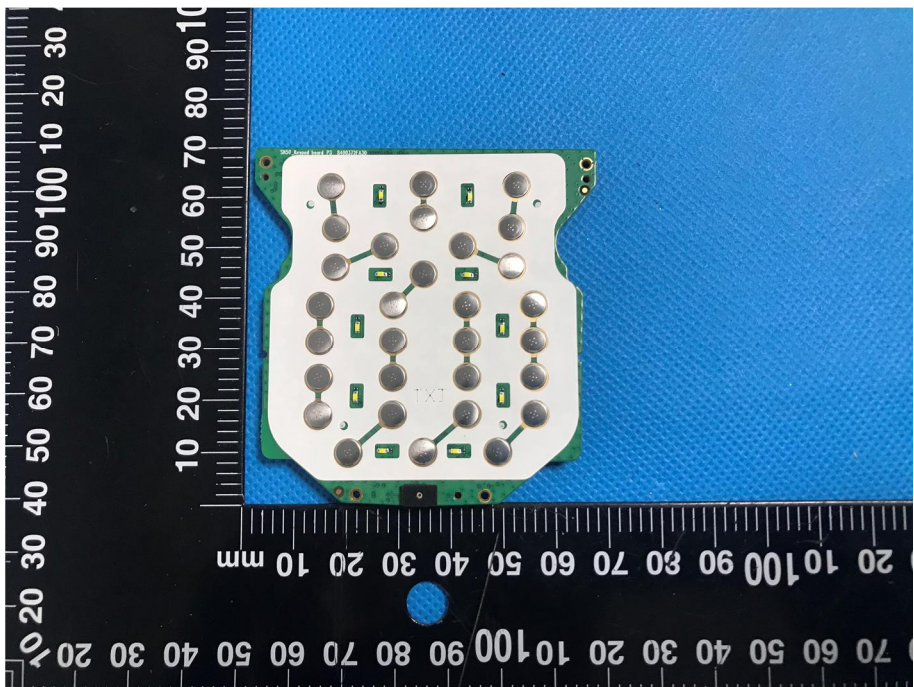

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

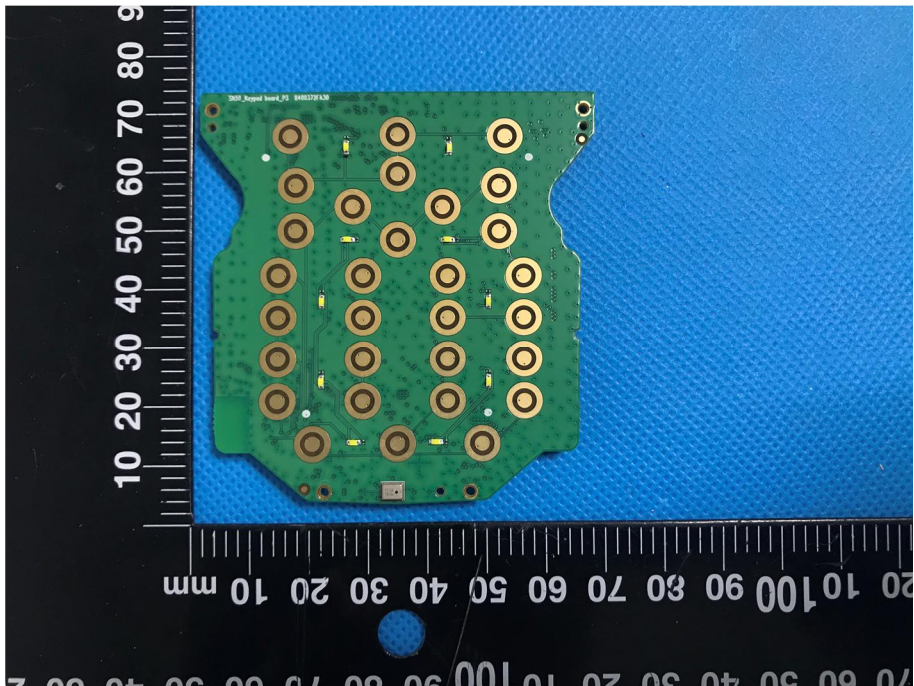

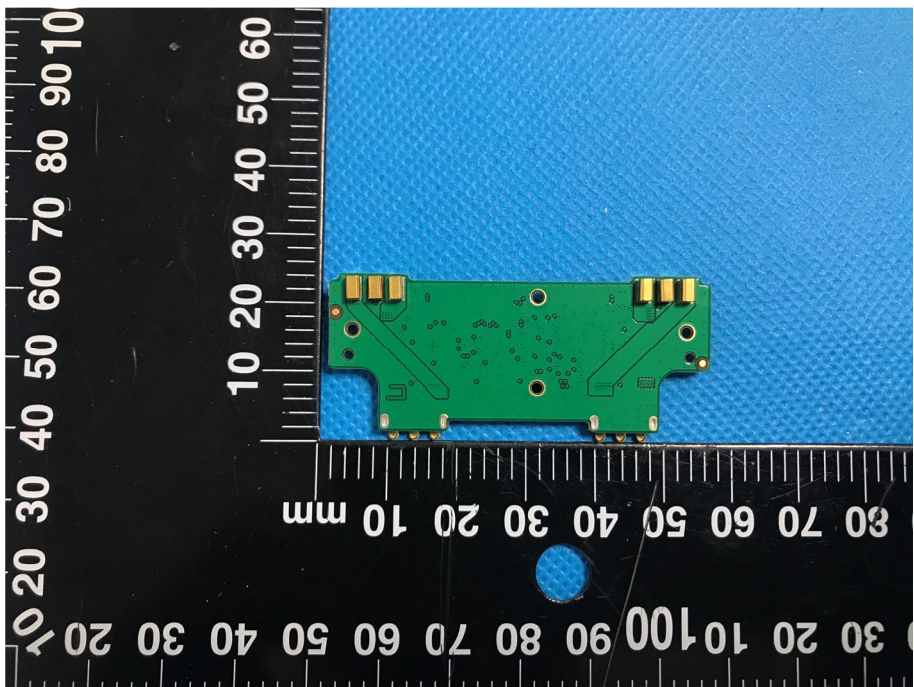

**EUT Housing and Board
View 1**

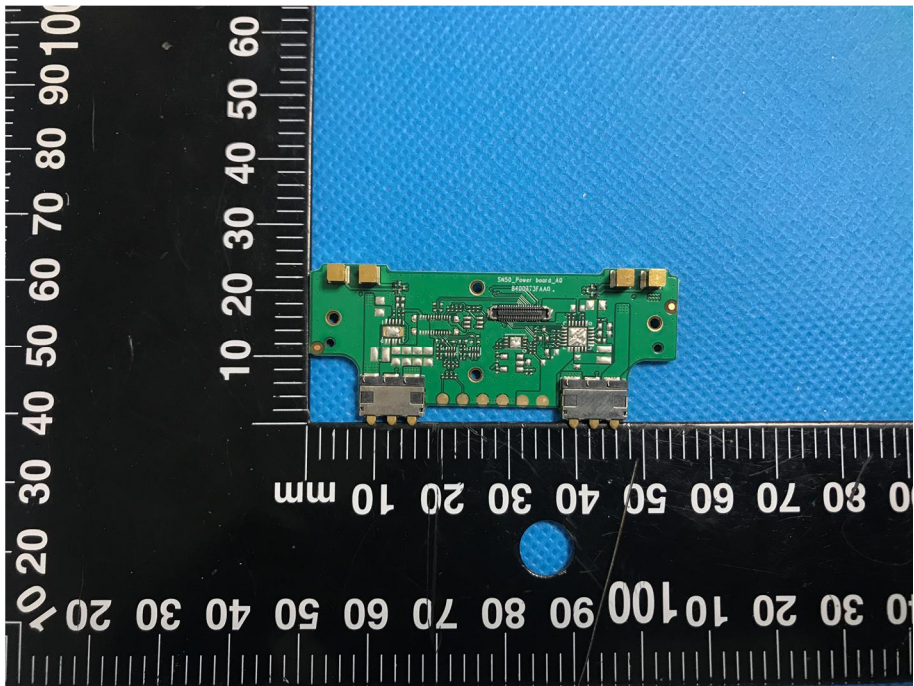

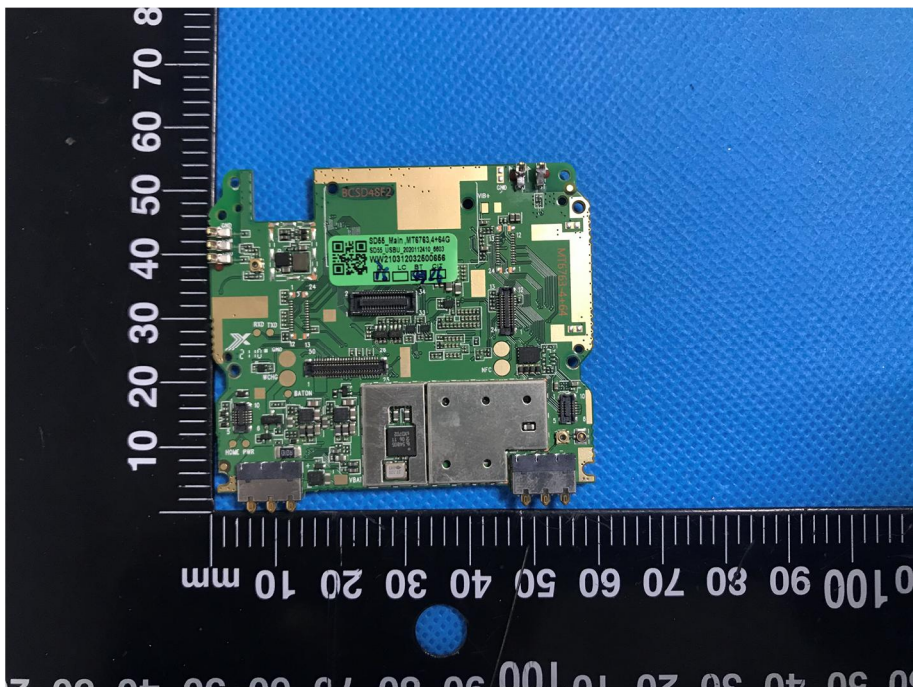

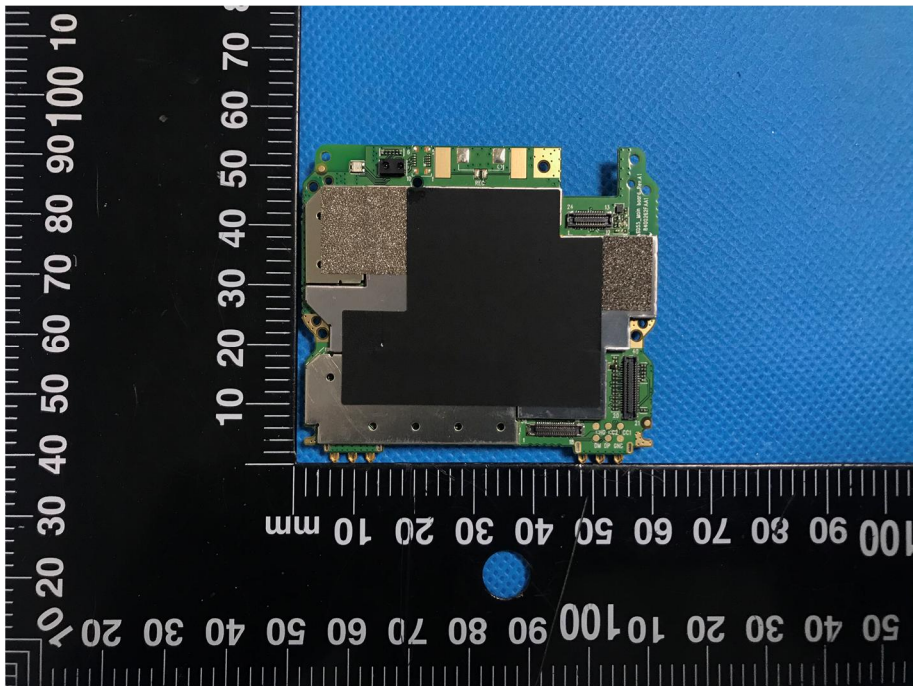

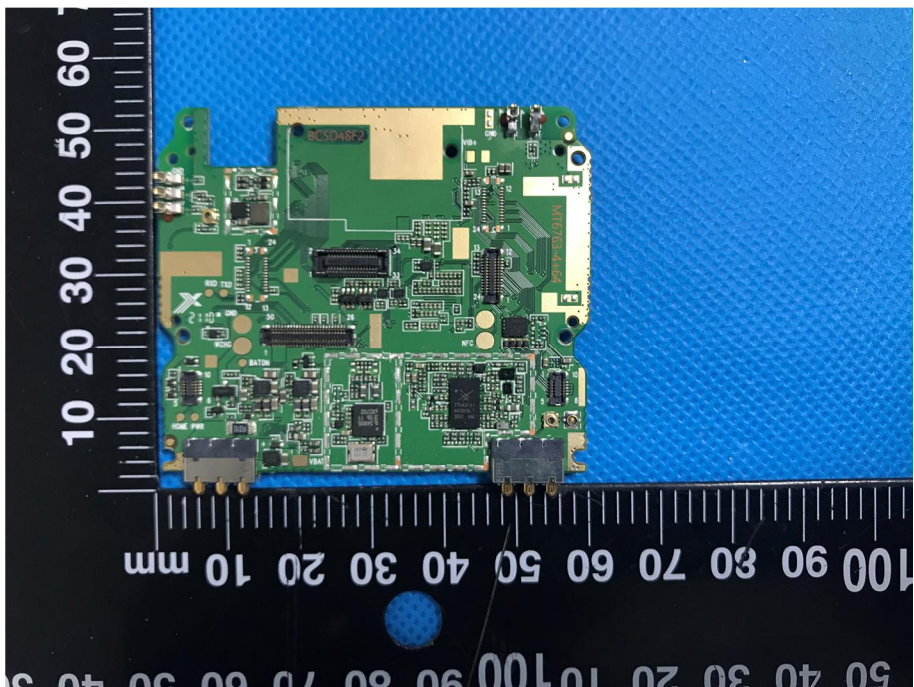

**EUT Housing and Board
View 2**

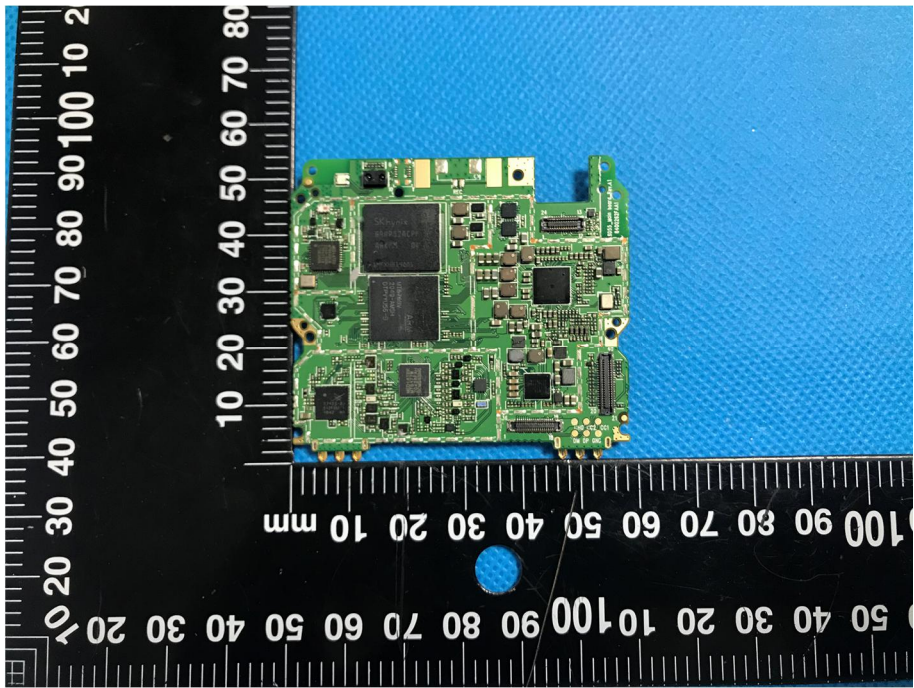

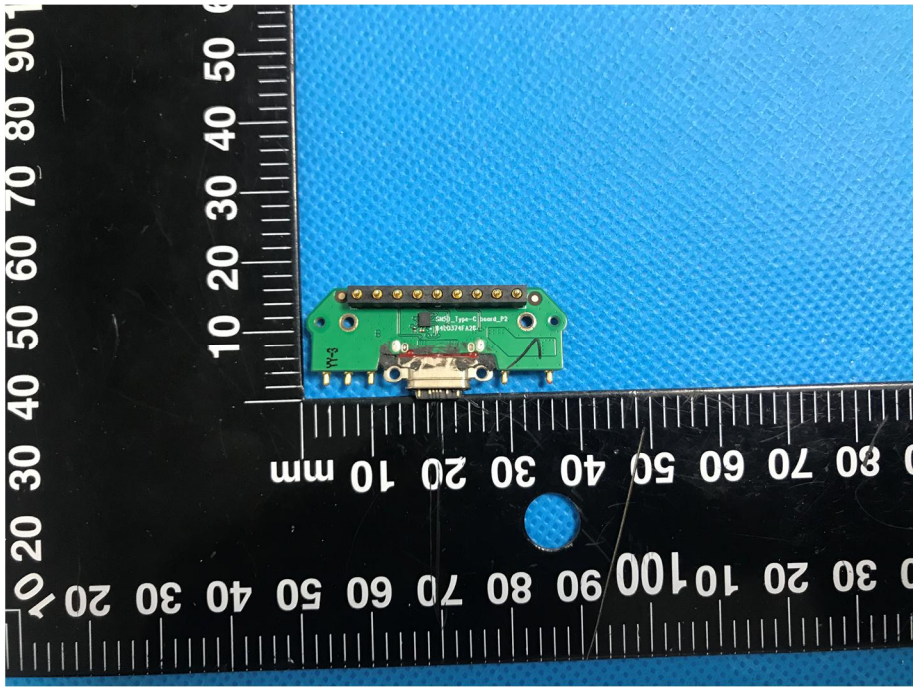

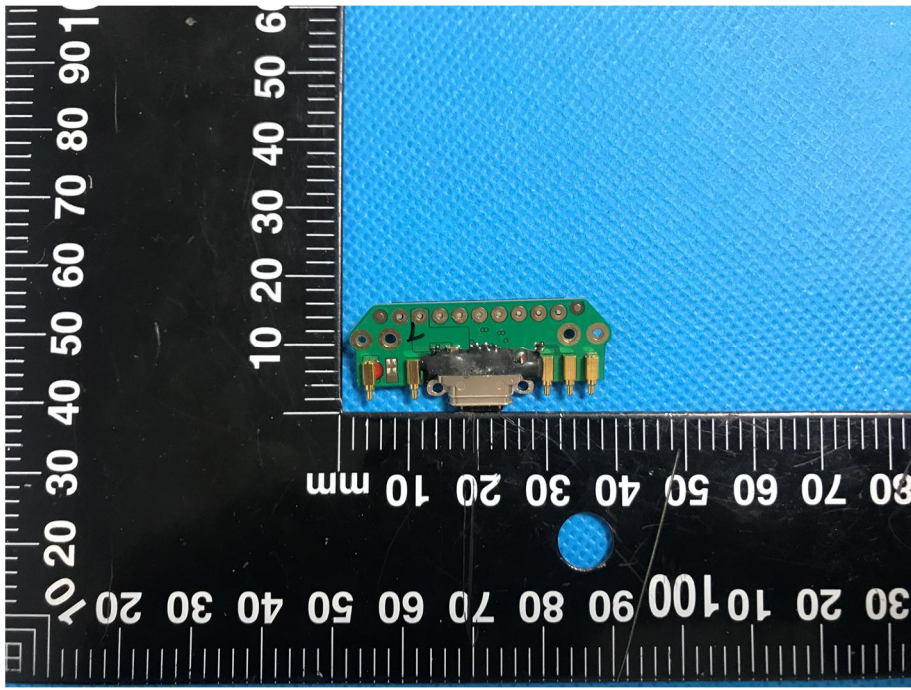

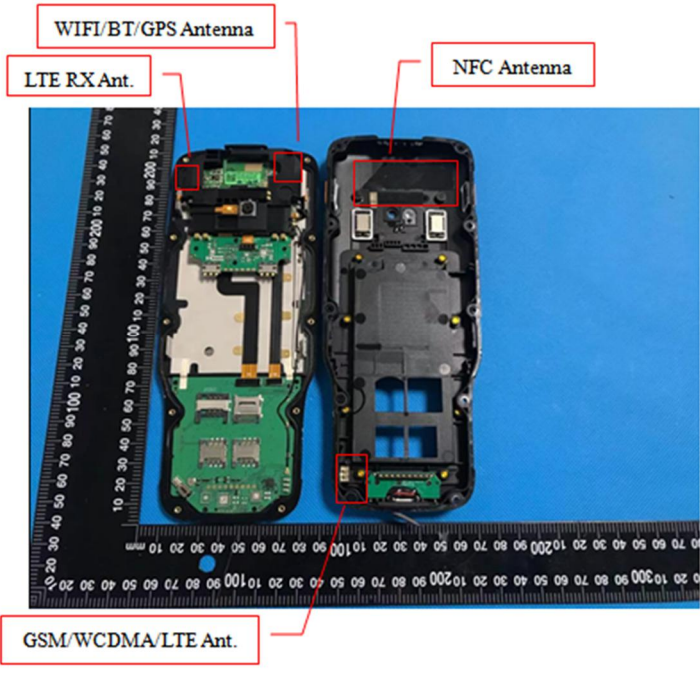

<p style="text-align: center;">Solder Board-Component View 1</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The board is irregularly shaped and features several components: two SIM card slots, a USB connector, and various surface-mounted components. The board is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom edges, showing measurements in millimeters (0 to 100 mm).</p>
<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of the same green PCB component, labeled 'Solder Board-Component View 2'. This view shows the reverse side of the board, which is populated with numerous silver solder balls arranged in a grid pattern. The board is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom edges, showing measurements in millimeters (0 to 100 mm).</p>

<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled '3', showing a grid of 24 circular solder pads. The board is positioned on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's length being approximately 80 mm and its width approximately 60 mm. The board has a small white label at the top left corner that reads '2007 Solder board_P3 04033440W'.</p>
<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled '4', showing a rectangular board with several gold-colored pads and traces. The board is positioned on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's length being approximately 60 mm and its width approximately 30 mm.</p>

<p>Solder Board-Component View 5</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 5'. The component is rectangular with several gold-plated connectors along its edges. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 60 mm and its width approximately 25 mm. The component has various electronic components and traces visible on its surface.
<p>Solder Board-Component View 6</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 6'. This component is more complex than the one in View 5, featuring a large central chip, various smaller components, and a prominent silver-colored metal shield. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 80 mm and its width approximately 40 mm. The component has various electronic components and traces visible on its surface.

<p style="text-align: center;">Solder Board-Component View 7</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 7'. The component is rectangular with a large black rectangular area in the center. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm and its width approximately 40 mm.
<p style="text-align: center;">Solder Board-Component View 8</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 8'. The component is rectangular and densely populated with various electronic components, including integrated circuits, capacitors, and resistors. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm and its width approximately 40 mm.

<p style="text-align: center;">Solder Board-Component View 9</p>	 A photograph of a green printed circuit board (PCB) component, labeled '9', showing various electronic components including integrated circuits, capacitors, and connectors. The component is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
<p style="text-align: center;">Solder Board-Component View 10</p>	 A photograph of a smaller green PCB component, labeled '10', featuring a connector and several surface components. It is positioned on a blue textured surface next to a black ruler with white markings in millimeters, showing measurements from 0 to 100 mm.

<p style="text-align: center;">Solder Board-Component View 11</p>	 <p>A photograph of a small green printed circuit board (PCB) component, likely a solder board, placed on a blue textured surface. The component has several gold-plated pins and a central connector. It is positioned next to a black ruler with white markings in millimeters, showing a scale from 0 to 100 mm. The ruler is oriented vertically on the left and horizontally at the bottom.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph showing the internal components of a mobile phone, specifically the antenna sections, laid out on a blue background. A black ruler with white markings in millimeters is placed vertically on the left side of the components. Four red boxes with white text labels are connected to specific antenna components by red lines:</p> <ul style="list-style-type: none">WIFI/BT/GPS Antenna: Located at the top of the left component.LTE RX Ant.: Located on the left side of the left component.NFC Antenna: Located on the right side of the right component.GSM/WCDMA/LTE Ant.: Located at the bottom of the right component.
