

EXTERNAL PHOTOGRAPHS OF EUT

A photograph of the hardware components for a smart meter system, laid out on a light-colored surface. The components include: a white power outlet with three sockets; a black USB cable with a standard USB-A connector; a small black LCD display with a screen and three yellow buttons at the bottom; a black USB-to-RS485 converter module; a white USB-to-RS485 converter module; and a black rectangular module. Wires connect the USB cables to the converter modules, and the converter modules to the LCD display. The black rectangular module is also connected to the system via red and black wires.

A black, rectangular, glossy component, likely a solar panel or sensor, resting on a white, textured surface. Two thin wires, one red and one black, extend from the right side of the component.
