### **BLUETOOTH FUCTIONS**

Be aware that the Bluetooth connection range is 10 meters.

to select Bluetooth mode. It will sound a prompt tone, the mode indicator LED turns blue and will be flashing. The light is now ready to pair with your cell phone.

Turn on the Bluetooth feature of your cell phone and turn down the volume to avoid sudden loud sound bursts from the speaker. Enable the search or scan feature to find the MINI-SPEAKER.Note: If you have more than one light within range, make sure you are connecting to the appropriate speaker. When open music, the blue light will slowly flashing, after long press again, the blue light disappear with that prompt tone, the Bluetooth disconnected. Note: If you want to connect the light to another cell phone after pairing successfully, then you need to turn off the Bluetooth on

the paired cell phone firstly if it is in range before going through the above steps. Other wise, the light will automatically reconnect to the previously linked cell phone. Short-press VOLUME +/- button to adjust the volume level. Long-press VOLUME +/- button once to skip to next/previous song.

- Select "MINI-SPEAKER" from the device list when it appears on your cell phone screen.
- After successfully pairing your cell phone with the light, the Mode indicator LED stops flashing and remains blue, you will hear a prompt tone. You can now play music from your cell phone wirelessly to the light.
- In power mode, if no sound playback or paused by user, unit will keep standby mode within range. If disconnected after 10minutes, the light will turn off automatically for power saving.
- Bluetooth mode operates normally while work light is power on, charging and recharging.

## **FCC Statement**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
