

<p style="text-align: center;">Solder Board-Component View 16</p>	 <p>A photograph of a green printed circuit board (PCB) component, likely a solder board, placed on a blue perforated surface. The component is rectangular and populated with various electronic components, including a microcontroller, several resistors, capacitors, and a white connector. A metal ruler is positioned vertically to the left of the component, showing a scale from 1 to 9 centimeters. A second metal ruler is positioned horizontally below the component, showing a scale from 1 to 10 centimeters. The component's length is approximately 6.5 cm and its width is approximately 2.5 cm.</p>
<p style="text-align: center;">Solder Board-Component View 17</p>	 <p>A photograph of a blue cylindrical battery component, likely a Li-ion battery, placed on a blue perforated surface. The battery has a white label with Chinese and English text. A metal ruler is positioned vertically to the left of the battery, showing a scale from 1 to 11 centimeters. A second metal ruler is positioned horizontally below the battery, showing a scale from 1 to 12 centimeters. The battery's length is approximately 10.5 cm and its diameter is approximately 1.5 cm. Two wires, one red and one black, are attached to the positive and negative terminals of the battery.</p>

<p style="text-align: center;">Solder Board-Component View 18</p>	 <p>A photograph of a blue cylindrical battery component with a white label and a three-wire connector. The battery is placed on a blue textured surface next to a metal ruler for scale. The ruler shows centimeters and millimeters.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph of a green printed circuit board (PCB) with various electronic components. A red box highlights a gold-colored antenna structure on the board, with a red line pointing to a label "BT Antenna" above it. A metal ruler is placed below the board for scale.</p>
