

To Whom It May Concern,

Nix Sensor Ltd has developed a low cost, highly accurate color sensor that utilizes Bluetooth Low Energy (BLE 4.0) to send color values directly to a phone or tablet. The new color sensor, the Nix Pro 2, is approximately 59 mm wide at its widest and 43 mm tall. Due to its small and unique shape, the radio regulatory labels (FCC and ISCED) for this type of radio device do not fit on any surface of the product even at extremely small font.

Both regulatory bodies (FCC and ISCED) have agreed separately that instead of placing the labels onto the device, Nix Sensor Ltd may place the ID's onto the packaging of the device as well as in the online user manual. In the online manual as well as in the accompanying app, there will be a subsection for 'Regulatory Information' which will include the following:

Regulatory Information

Nix Pro 2

Model Number: NIXPRO002

FCC ID: 2AMKINIXPRO002

IC: 22848-NIXPRO002

HVIN: NIXPRO002

Thank you,
Dixon J. Paez
