FEATURES

Dashboard

FEATURES

Motion Zones

Create and customize up to 3 motion zones so you can focus on the most important areas of your home. When motion is detected, you'll get an alert instantly to your mobile device.

FEATURES

Human Detection

Have the camera only alert you based on human-shaped objects to help avoid false alerts due to shadows, lighting, plants, and others.

FEATURES

Night Vision

The Codi camera will make sure you stay protected day and night. The built-in infrared LEDs turn on automatically in low light and allows you see up to 30 feet in the dark.

Free Cloud storage

Every camera comes with FREE 24-hr video history that can be played back from the app. You can even download the recordings directly to your mobile device for permanent safe-keeping.

TROUBLESHOOTING

The camera's LED indicator light will let you know what it's doing.

LED Color	Description
Solid Red	Camera is booting
Blinking Red	Disconnected from WiFi
Blinking Red and Blue	Camera is in pairing mode
Solid Blue	Live stream/recording in progress

TROUBLESHOOTING

If your camera is having app, streaming, or connection issues, try these steps to correct the issue.

Force close the app

If you're experience issues with the app, many times it can be resolved by restarting the app. Completely close the app on your mobile device then open the app again.

Power cycle the camera

Unplug the camera, wait 10 seconds, then plug it back in.

Reset the camera

1. To reset the camera, hold the Reset button on the back of the camera for about 10 seconds. During the reset sequence, the LED indicator light on the front of the camera will first display solid red, then blinking blue.
2. Once the camera is blinking red and blue, you will need to pair the camera again.

Why can't the app find my camera during pairing?

- Make sure your Bluetooth and location settings are turned on from your mobile device. Also make sure the camera is in pairing mode.

Why can't I find this device on the pairing list?

- Make sure that you've downloaded the correct Momentum Secure app from the app store.

Do I need a microSD card to record videos?

- A microSD card is not necessary as every camera comes with free cloud storage that allows you to save recorded activity for 24 hours.

Why can't the camera read the microSD card?

- The camera can only support up to 128GB cards and must be in FAT32 format. You can also try formatting the SD card from the camera's General settings page.

Why does my camera keep disconnecting?

- The camera may have a poor internet connection with your router. Try moving the camera closer to your router and make sure the network is stable.
- You can also try the 'WiFi Network Test' from the camera's settings page to test your network speed.

Why does the stream keep failing to load?

- There could be several reasons, but most commonly it may be due to poor internet connection from the mobile device you're using to stream the camera. Make sure you have a strong internet connection while attempting to stream.

Why is the video stream so slow?

- This may be caused by a slow internet connection from the camera. You can try improving the video speed by lowering the video resolution from the camera settings.

Do I need a microSD card to record videos?

- This may be caused by a slow internet connection from the camera. You can try improving the video speed by lowering the video resolution from the camera settings.

Why is there a big glare when I have the camera facing my window?

- This is caused by the infrared LEDs reflecting off the glass. You can mitigate this by turning off the night vision setting, however you will lose the ability to see in dark environments.

How do I recover recordings that have expired from the cloud?

- Cloud recordings that have already expired cannot be recovered. It is recommended to download the recordings directly to your mobile device before they expire.
