TWS ANC Buds

# LINNER

NC300 PRO

Thanks for your choice of our product.

Linner TWS ANC buds integrate stylish appearance and functions, allowing you to experience quiet wireless calling and listening to music even in noisy environment. It is a good choice for you to work, go out, and drive.

True Wireless Stereo Active Noise Cancellation Technology

With the technology of Bluetooth, you can select compatible communication devices without using cables. Bluetooth does not require keeping the phone facing earphones directly, but the maximum distance between them should not exceed 10 meters (about 30 feet).
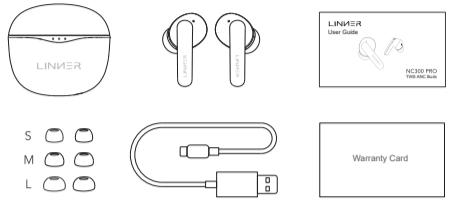

Using active noise cancellation technology, the microphones collect the noise, then the acoustic engineer calculates and designs a series of software and hardware algorithms, the circuit generates a reverse sound wave that is opposite to the noise and emits it through the horn. Finally, the noise and the reverse sound wave cancel each other.
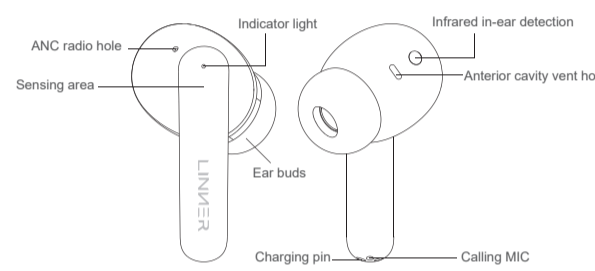

Specifications

Model: NC300 PRO	Earphone Battery Capacity: 45mAh*2
ANC Noise Reduction: 35dB	Battery Capacity (Charging Box): 380mAh
Bluetooth Version: 5.2	Charging Time (Earphone): 1.5H
Impedance: 32Ω	Charging Time (Charging Box): 2H
Charging Port: Type-C	Working Time (ANC OFF): 7.5H
	Working Time (ANC ON): 6.5H

Overview and Packing List

The package contains Linner NC300 PRO TWS ANC buds, a charging box, 3 sizes of ear buds (the M size ear buds are pre-installed on the earphones), USB-C charging cable, user guide, and warranty card.

Wearing Earphones

In order to obtain a better noise cancellation effect, the wearing angle can be adjusted appropriately after wearing, so that the earphone is slightly pushed into the ear canal.

Auto Power ON/OFF

Auto power on

Open the cover of the charging box, the earphones will power on automatically.

Auto power off

Put the earphones into the charging box, close the cover, and the earphones will power off automatically.
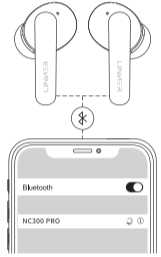

Earphones Pairing

In order to convenience operation, the pairing between left and right earphones has been completed before leaving from factory.
When the cover is opened, earphones are turned on automatically, the left and right earphones are interconnected, and enter into connection or pairing status.

Bluetooth Pairing

① Open the charging box, keep the earphone in the charging box, triple click the charging box button to force the mobile phone to enter into pairing state. Please note that this operation will not clear the previous Bluetooth pairing record.

② After the pairing of the left and right earphones, open the Bluetooth search in mobile phone, and connect the device. Then the mobile phone displays the pairing name as "NC300 PRO".

③ When using again, double earphones will pair with each other and return to the last pairing device automatically.

Bluetooth
NC300 PRO

---

④ For single earphone use, pick up one side and keep the other side closed in the charging box. After the earphone which is taken out failed to reconnect to TWS, it will enter the reconnecting and pairing coexistence mode within 2 seconds. After connecting the phone, take out another earphone and enter binaural mode automatically.

⑤ Stay in the pairing or reconnecting state for 10 minutes. After 10 minutes, earphones enter the standby mode but will not power off automatically.

Bluetooth Lost

① Turn off mobile phone's Bluetooth, earphones will enter the pairing mode and do not connect back. (It will continue for 10 minutes. If no connection, earphones enter standby mode after 10 minutes.)

② If the connection range is exceeded, it will enter the back-connection mode, and can pair with other devices at the same time. (It will continue for 10 minutes. If no connection, earphones enter standby mode after 10 minutes.)

Light Sensor Function

① ANC mode: Earphones will enter ANC mode automatically when wearing. Earphone will enter the ambient Mode automatically when using single.

② Answer the call: When calling comes, wear the earphones to answer the call.

③ Music pause and play: Using double earphones to listen to music, pause the music when one earphone is out, and back to play automatically when re-wear within 1 minute.
