Subject: RE: E: SANITAG TECHNOLOGIES CORPORATION - FCC ID:  
2AMOW-AT00123H - JOB #: 1754BUC17

Per your suggestion, on behalf of Sanitag, we are requesting that FCC Certification for the above referenced project be dismissed and re-issued because the original DXX Form 731 for this project was not marked for a composite filing and the product contains a UWB Device which requires a PAG before issuance of the certificate.

On behalf of Sanitag, we are:

1. Requesting use of FCC ID: 2AMOW-AT00123H for both the UWB and DXX portions of the device.
2. Declaring that the device has not been and will not be sold since the UWB certificate is still pending.
3. Stating that we will correct Form 731 to indicate that this is a composite filing and re-file for the DTS device along with the separate UWB application currently pending.
4. We understand that a PAG will be submitted for the UWB before the device is granted.

Best Regards,

A handwritten signature in dark ink, appearing to read "Sandi McEnery", is written over a light blue horizontal line.
