Shenzhen Elink Smart Co., Ltd. www.elinksmart.com

I. Download and Install APP

eSmartCam APP support iPhone and Android phone.

Please make sure that the iPhone system version is iOS 8.0 or above.

Enter the APP Store, search for "eSmartCam", or scan the following QR code.

2. Android Phone

Please make sure your phone system is Android 4.0.3

Enter the "Google play", search for "eSmartCam", or scan the following QR code.

II. Connect Camera

1. APP User Registration

Open "eSmartCam" APP on the phone, and then click "Quick Registration" to enter "Quick Registration" interface. According to the prompts, create a new account or register by email, then enter password to finish registration.

2. Add Camera

2.1 Smart Connection

Click "+" button, the interface will be shown as below, then select "Smart Config".

According to following page, input WiFi SSID and password, and then clik "next", keep the phone close to the camera, and wait for a moment, until it shows bind successfully.

Note: please make sure the router band is 2.4G Wi-Fi.

2.2 QR Connection

After a successful registration, check the status of the camera, open the application, you will see the following screen, and then follow below tips on the phone to operate:

Please double check the camera status is correct or not, if not, please follow on the operation as below:

And then please enter WiFi SSID and password. Please ensure that the phone and camera connected to the same WiFi.

APP will generate a QR code, please keep the phone QR code face to camera within 30cm distance and scan it,

After implementation of above process, if the notification shows "Bind success", it means connection is successful, otherwise you need to reset the camera and connect it

2.3 Wired Connection

Click "+" button and select "wired connection", as shown

And then it will search out all the IPCs in the LAN, click on one of the cameras to connect, the IPC will ring Dingdong, then a prompt box will come out. Please confirm whether to bind the camera. Followed by this operation, until you find the right camera according to the sound, and click "OK" to bind the camera as shown below:
