To get full help content, search the search box on the taskbar for what you want to know,

Simple troubleshooting

Q: When the laptop system crashes. How do I force the shutdown?

A: Please hold the power switch for 6 seconds. You can force the shutdown.

Q: When the laptop does not boot. What are the basic steps to check?

- A: 1. If you connect to the power adapter, you can turn on the machine. That means the battery is low
2. Check if there is a display switch that turns on the LCD LCD screen. Or LCD LCD screen display switch
3. Check the cause of additional memory

Q: How to prolong battery usage time?

- A: 1. The LCD is adjusted to brightness for proper brightness.
2. Adjust the volume to the proper size.
3. Take out the external equipment that does not need to be used
4. Setting power management configuration.

Q: Why does the laptop display 95% of the battery power, but the charging indicator does not charge?

A: This is normal. Laptop batteries are designed to charge only when the battery is less than 95%. This is done to avoid frequent battery charging.

FCC Warnings:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This modular complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
