

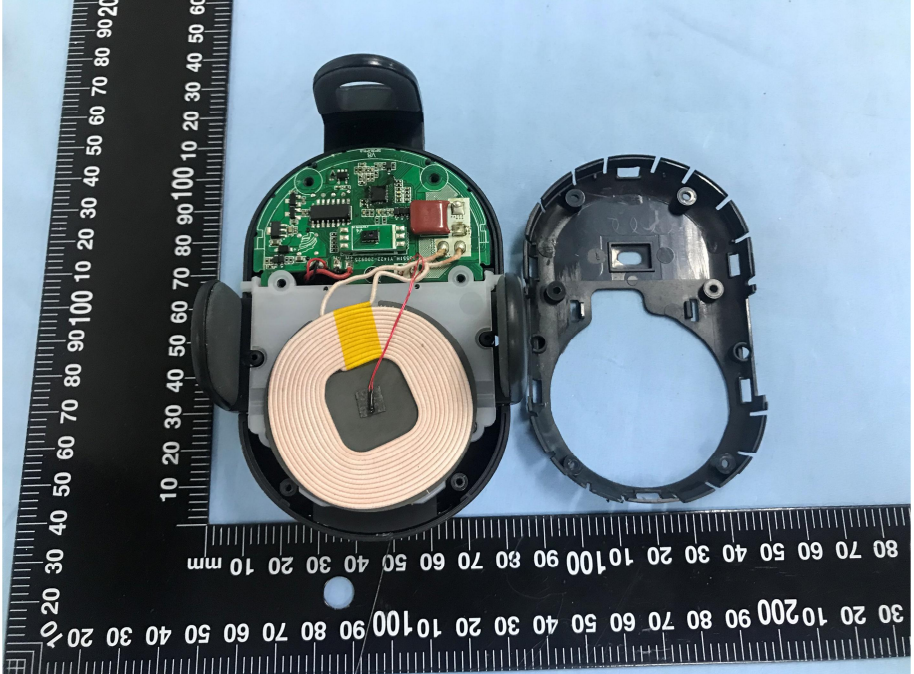

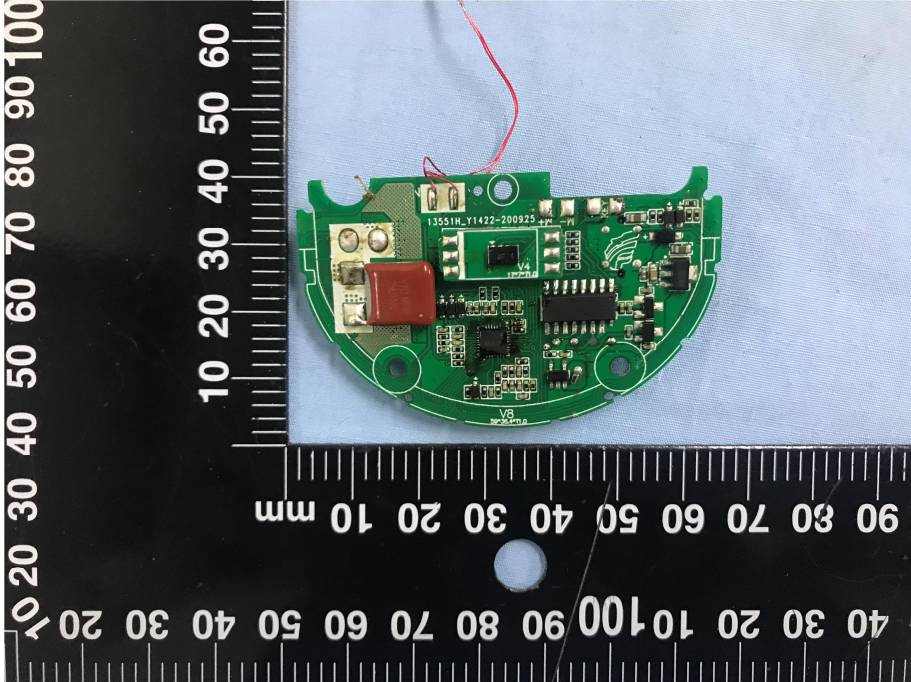

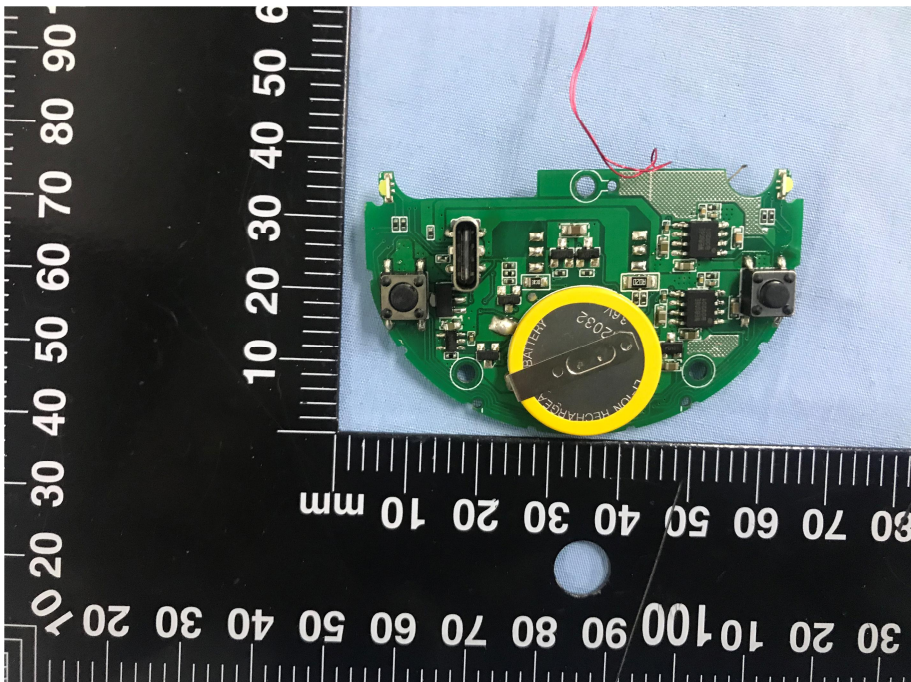

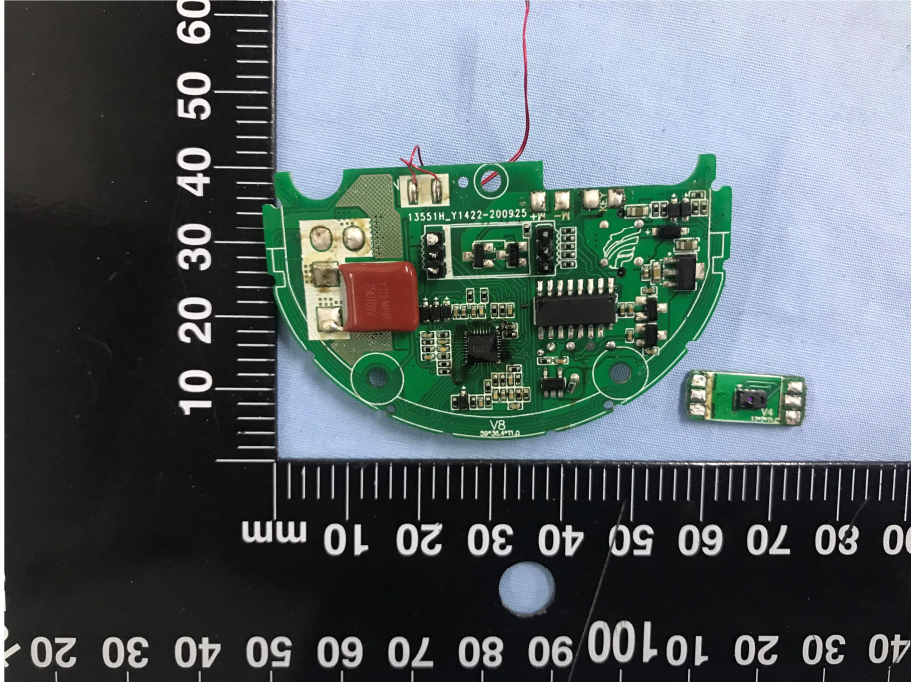

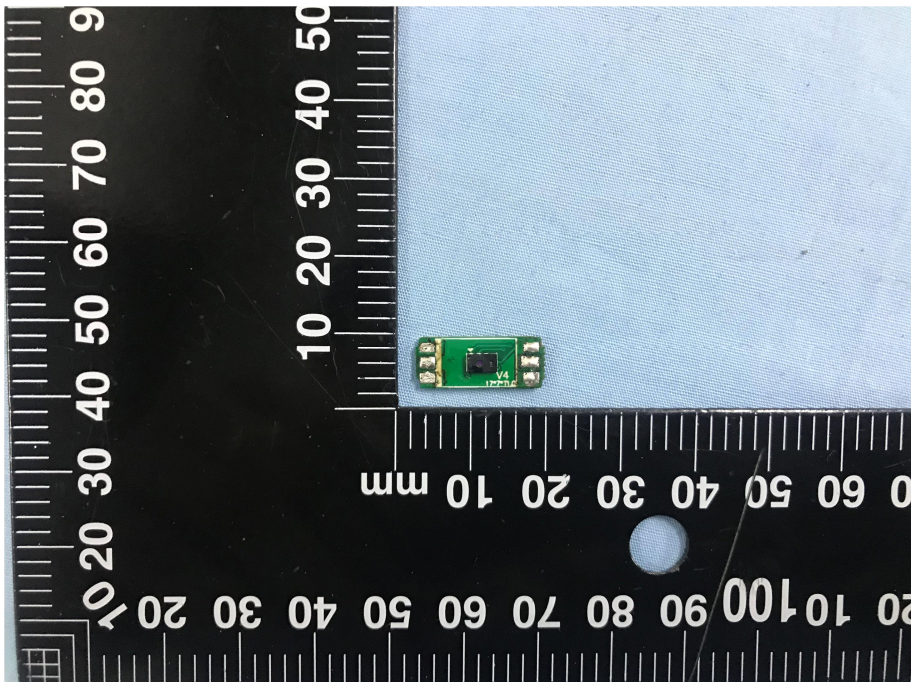

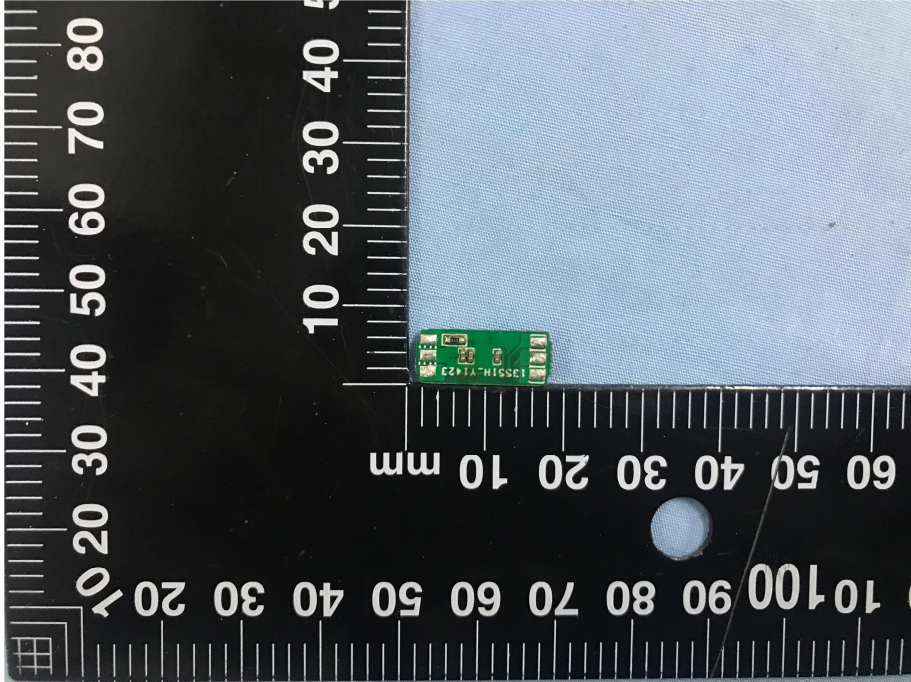

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	
<p>EUT Housing and Board View 2</p>	

<p>Solder Board-Component View 1</p>	 <p>A photograph of a green, semi-circular printed circuit board (PCB) with various electronic components. A red wire is connected to the top edge. The board is placed on a black background with a white ruler for scale. The ruler shows measurements in millimeters, with the top edge of the board aligned with the 0 mark. The board's width is approximately 100 mm. Components visible include a red electrolytic capacitor, a black integrated circuit (IC), and several smaller surface-mount components. The board has two circular mounting holes on the left side.</p>
<p>Solder Board-Component View 2</p>	 <p>A photograph of the same green, semi-circular PCB from a different perspective. A yellow battery is attached to the bottom edge. The board is placed on a black background with a white ruler for scale. The ruler shows measurements in millimeters, with the bottom edge of the board aligned with the 0 mark. The board's width is approximately 100 mm. Components visible include a yellow battery, two black circular components (possibly microphones or sensors), and various other electronic components. The board has two circular mounting holes on the right side.</p>

<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph showing a green PCB with various components, including a red capacitor and a black IC. The board is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's width being approximately 60 mm. A small component is also visible to the right of the board.</p>
<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph showing a small green PCB component with four pins. The component is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 10 mm.</p>

<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph showing a small green printed circuit board (PCB) component mounted on a blue fabric surface. The component is positioned between two black rulers. The ruler on the left is oriented vertically with markings from 0 to 80. The ruler on the bottom is oriented horizontally with markings from 0 to 100. The component is a small, rectangular PCB with several gold-colored pads and a central component. The text '1351H-V1423' is visible on the component.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph showing the back of a black mobile phone case with the wireless charging antenna coil exposed. The coil is a series of concentric, light-colored turns. A red box highlights the coil, and a red line points from a label 'Wireless Charger Antenna' to it. The phone case is placed on a blue fabric surface next to a black ruler with markings from 0 to 100. The ruler is oriented vertically on the left and horizontally at the bottom.</p>
