Subject: Application for Class II Permissive Change, FCC ID: 2AMS3NIMBUS

Dear Application Examiner,

The purpose of this filing is to apply for a Class II permissive change to the LoRa Module filed under FCC ID: 2AMS3NIMBUS. The reason for the permissive change request is to address a change of antenna type from the original filing. A test report containing radiated spurious emissions results is included to show continued compliance of the module with this antenna. Also included are the RX exposure calculations with the new antenna gain taken into consideration.

Your efforts in reviewing this application are greatly appreciated. Please contact me if there are questions or additional information needed concerning this request.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Jeremy Pickens'. The signature is fluid and cursive.
