WiFi Antenna

The image shows the internal components of a device housed in a metal chassis. A clear plastic cover is partially open, revealing a black WiFi antenna module labeled 'TAOGLAS' and 'FXP.831'. A red arrow points to this module. Various cables, including a multi-colored ribbon cable and a black cable, are connected to the system. A green circuit board with various components is visible in the background. Two grey fabric straps with red markings '8' and '6' are used to secure the internal components. A white label with the number '2LE' is attached to one of the cables.
