RE: Duracell "DURACELL Powercheck" AA and AAA identical circuit.

Date: July 9, 2019

American Certification Body, Inc.  
6731 Whittier Avenue  
Suite C110  
McLean, VA 22101

To Whom It May Concern:

The DURACELL Power Check AA and AAA sensors (Models: PC3-10 & PC3-20) are the same circuit. The PCB and Firmware are tuned to work on both AA and AAA batteries. The only difference is the battery attachment wires (shown below) and the authentication code which have no impact to the BLE stack. Therefore, we do not see any technical differences that should require separate testing.
