

Label and Label Location

You can display the QR code that leads to these instructions and regulatory info at any time by accessing Settings> Regulatory >QR Code on your device

Go to the Settings screen and select Regulatory to view the IC number.

There are no restrictions preventing access to the device's own display screens or the web pages that contain the basic information required to operate the product and any regulatory text and e-labels.

We include a printed insert in the packaging that contains the regulatory information.

The regulatory information is visible to persons with normal eyesight, without need for magnification. The text is approximately 2mm tall. The display also has a backlight that allows for visibility in the dark. Total display area dimensions are 26 x 22mm. Exact screen contents shown below.

The regulatory information displayed on the product display is not user-alterable and cannot be deleted. It is always available through the product's menu system and the required menu structure is not alterable by the user.
