Package contents

Product name: Tablet PC
Product Model numbers: Acer One 8 T4-82L
Power adapter (100V-240V)$_x$ ™
Quick guide
Technical specifications
Processor (CPU): MTK8766
Operating system: Android 10.0
RAM/Internal storage: 2/32GB
Screen size: 8"
Display: IPS display (800*1280; 16:9)
Camera: Front: 2MP+5.0MP
Interfaces: 1XUSB, 1x SIM Card audio out/MIC in (3.5mm),
Network: WIFI 802.11 a/b/g/n:2.4 GHz/5 GHz, Bluetooth 5.0
Card slot: micro SD (HC/XC) up to 128GB,
More: , G-Sensor, dual-microphone, stereo speaker
Size: ca.185x180 x9.9mm
Weight: approx315 g
Material/Color: plastic
Battery: Li-polymer 5100mah (charging via USB)

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device,
pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable
protection against harmful interference in a residential installation. This equipment generates
uses and can radiate radio frequency energy and, if not installed and used in accordance with
the instructions, may cause harmful interference to radio communications. However, there is
no guarantee that interference will not occur in a particular installation. If this equipment does
cause harmful interference to radio or television reception, which can be determined by turning
the equipment off and on, the user is encouraged to try to correct the interference by one or
more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is
connected.
-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two
conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any
interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance
could void the user's authority to operate the equipment.

SAR tests are conducted using
standard operating positions accepted by the FCC with the MID transmitting at its highest
certified power level in all tested frequency bands, although the SAR is determined at the
highest certified power level, the actual SAR level of the phone. While operating can be well
below the maximum value, in general, the closer you are to a Wireless base station antenna,
the lower the power output. Before a new model phone is a available for sale to the public, it

must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body)as required by the FCC.

For body worn operation, this model MID has been tested and meets the FCC RF exposure. Guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions the handset a minimum of 0 cm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guide
