

<p>Solder Board-Component View 7</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'View 7'. The component is rectangular with several circular holes and various electronic components mounted on it. It is placed on a blue textured surface. A black ruler with white markings is positioned to the left and bottom of the component, showing measurements in millimeters. The ruler markings are oriented vertically on the left and horizontally at the bottom.</p>
<p>Solder Board-Component View 8</p>	 <p>A photograph of a small electronic component, labeled 'View 8'. The component is a small, rectangular integrated circuit (IC) with a yellow label that reads '14 Sensor 9'. It is mounted on a blue textured surface. A black ruler with white markings is positioned to the left and bottom of the component, showing measurements in millimeters. The ruler markings are oriented vertically on the left and horizontally at the bottom.</p>

<p>Solder Board-Component View 9</p>	
<p>Solder Board-Component View 10</p>	

<p>Solder Board-Component View 11</p>	 <p>A photograph of a small, dark-colored PCB component mounted on a blue textured surface. The component is rectangular with several small circular features. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 15 mm. The component has the text "NT-HC06L" and "2020.11.24" printed on it.</p>
<p>Solder Board-Component View 12</p>	 <p>A photograph of a small, green PCB component mounted on a blue textured surface. The component is rectangular and populated with various electronic components, including a central chip and several smaller components. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 15 mm.</p>
