### FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment. This equipment generates, uses and can radiate radio frequency energy and, if not properly used, can cause interference with the reception of radio communications. However, there is no guarantee that interference will not occur in certain environments. If interference does occur, adjustments to the equipment may be required to correct the interference. The user is encouraged to correct the interference by one of the following measures:

- ◆ Reorient or relocate the receiving antenna.
- ◆ Increase the separation between the equipment and the receiver.
- ◆ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ◆ Consult the dealer or an experienced radio/television technician for help.

Caution: Any changes or modifications to the device which are not approved by the manufacturer could void your authority to operate the equipment.

This device complies with the FCC Radio Frequency (RF) Emission Class B limits for the hearing aid product. The device is not intended for use in hospitals, clinics, or other medical facilities. The device has been evaluated to meet general FCC equipment requirements. The device can be used in portable equipment without additional restrictions.
