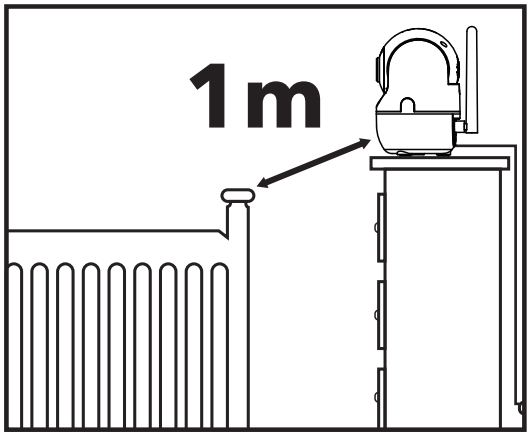
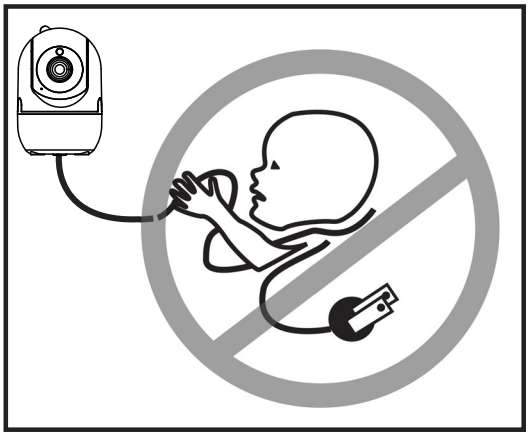
SAFETY INSTRUCTIONS

· Keep cord out of the reach of children (more than 3ft (0.9m) away) in case of STRANGULATION.





· NEVER place the camera or cord in or near the crib or playpen.
· NEVER mount the camera directly above the crib or playpen to avoid the risk of injury.
· Only use the AC adapters provided.
· Never use the unit near water, including near a bathtub, sink, laundry machine tube, wet basement, etc.
· Do not install near any heat sources such as radiators, heat registers, stoves, or other devices that produce heat.
· Only use attachments and accessories specified by the manufacturer.
· Unplug this device when unused for long periods of time.

CAUTION

· NOT toys. Do not allow children to play with them.
· This product is NOT intended to replace the proper supervision of children. You MUST check your child's activity regularly.

· This product is not intended for use as a medical camera and its use should not replace adult supervision.
· Unplug the product during lightning storms.
· Please check the operating range and condition of the camera carefully at the initial installation, and on a regular basis after that.
· Check the reception regularly. Test the camera before use and after changing the camera's location.
· For indoor use only.
· Clean the camera with a dry cloth only.
· Do not block any ventilation openings.
· Microphone feedback might occur when the monitor is too close to the camera. Please keep them at least 1.5m /4.9ft apart.

GETTING STARTED

1. Charging & Powering Babyphone

1) Connect the monitor to a power source via the type-C cable and power adapter.
2) Unplug the unit when its power indicator turns off, indicating a full charge. Of course, if it stays plugged in, it will not affect the use, but it may affect the battery life.
3) Press the power button on the monitor to turn on the device. See green power indicator lighting.

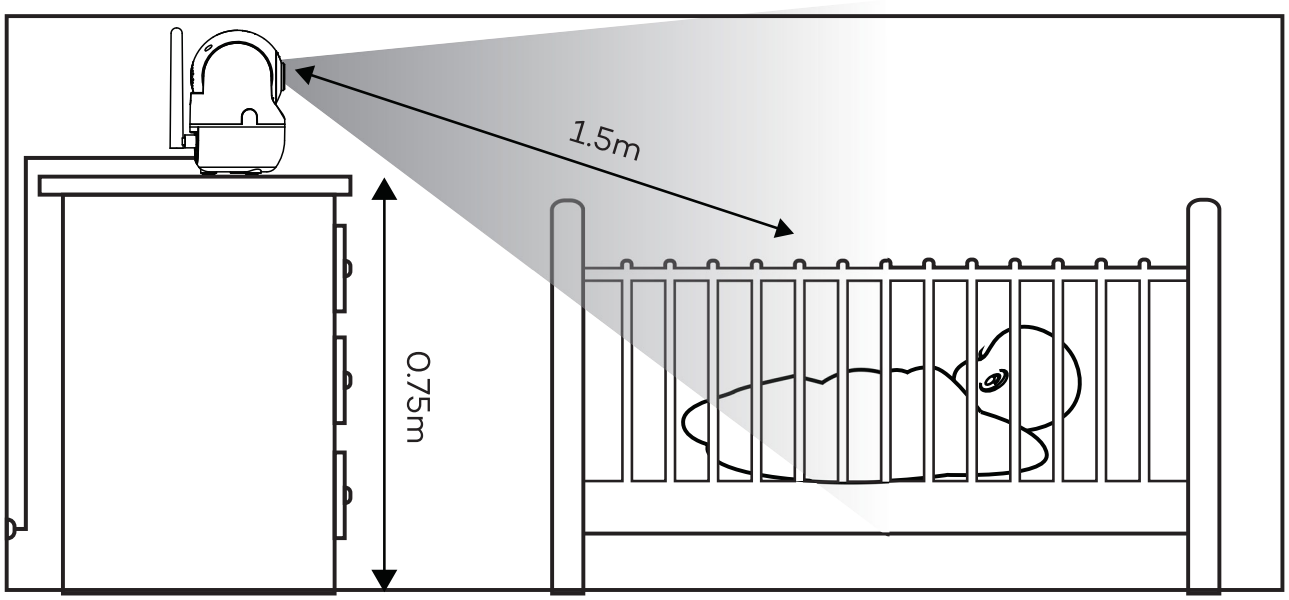
2. Powering Camera

1) Connect the camera to a power source via the type-C cable and power adapter.

- Only use the power adapters included in the package.
- Do not place the camera and power cord within the reach of your baby.

3. Placing the Camera

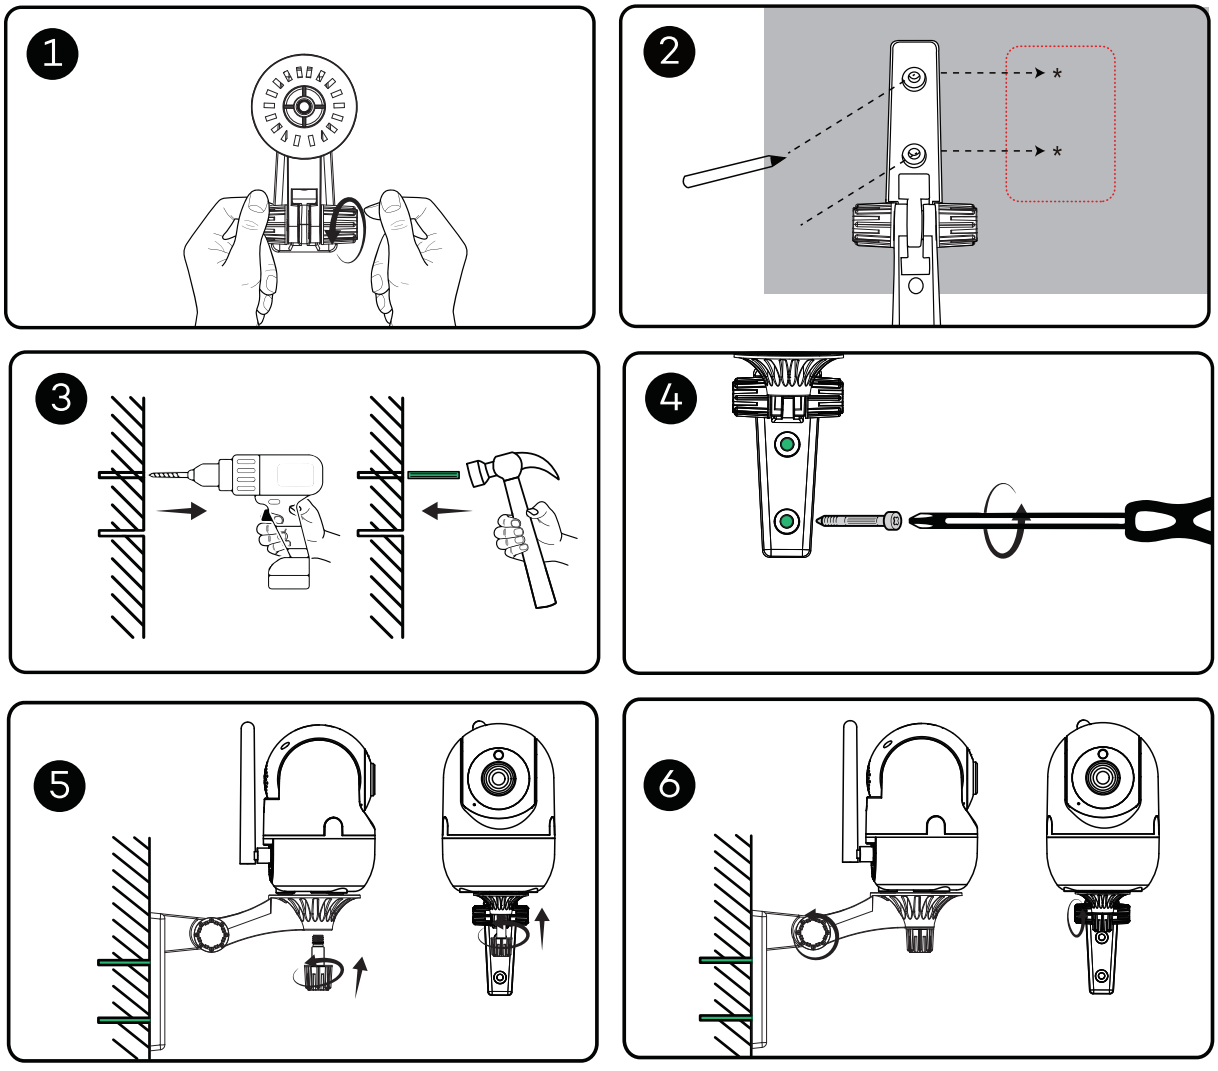
For safety reasons and better vision in night vision mode, place the camera on a 0.75m table top and ensure the distance from the baby is at least 1.5m.



4. Placing the Camera

Note: The camera bracket is an optional accessory

1) Rotate the knob in anticlockwise direction to adjust the wall mount bracket, then fasten the joint and secure the angle.
2) Mark the upper and lower holes with a pencil.
3) Drill holes in the wall (17/64 inch drill bit) and insert wall anchors into holes with a hammer.
4) Fasten the wall mount bracket with screws.
5) Place the camera on the wall mount bracket. Tighten the screw into the threaded socket at the bottom to secure the camera.
6) You can maximize your camera unit's viewing angles by tilting the wall mount bracket. Tilt your camera up or down to adjust to your preferred angle.



• Don't release the camera until it is firmly mounted.

Explanation:
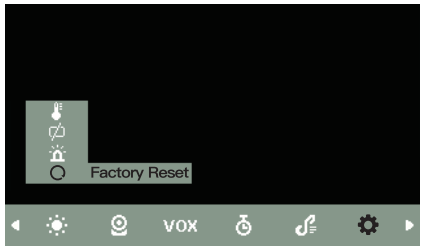
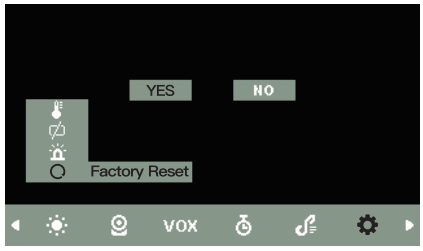
System will be restored to default Settings.

Step 1:
1. Press to enter menu page.
2. Choose -> -> OK button.



Step 2:
1. Choose **YES** -> OK button to start restoring factory settings.



TROUBLESHOOTING

Product not turning on?	· Check that the camera and monitor are turned on. · Check the camera and make sure it is well plugged into the outlet. · Check that the monitor has enough battery (when the battery level icon flashes red slowly on the display, it will automatically turn off in about 10 minutes).
Babyphone can't connect with the camera?	· Check whether the camera is near the monitor (recommended to keep within 1.5-2m while connecting). · Check whether the monitor is of low battery. Charge it in time to restore good connection. · Check whether the camera is well connected to power. · Check whether there are any large metallic objects including doors, refrigerators, mirrors, etc., placed between the camera and monitor thus blocking the radio signals. · Check whether there's any other 2.4GHz product used nearby like WiFi routers or microwave ovens, which may interfere the connection. · If nothing above is involved, please retry to pair.

Nothing shown when viewing a camera?	· Check all connections to the camera (power cable plugging and pairing). · Check whether the screen is in sleep mode. Press any button to awake it. · Check whether the camera is within range of the monitor. · Adjust the monitor antenna to vertical position for better signal transfer.
No sound from the monitor?	· Check the system to verify if the babyphone is set to mute.
Black and white pictures?	· Night vision LED may be ON. Please turn on room lights to force it out of the night vision mode.
Choppy videos?	· Check whether the camera is near the monitor and that there're no obstacles between them. · Adjust the monitor antenna to vertical position for better signal transfer.
Too much noise?	· Volume may be set too high. Press -> -> < Button to volume down. · The camera and monitor may be put too close; keep them at least 1.5m / 4.9ft apart.

WARRANTY & CUSTOMER SERVICE

12 months guarantee (contact information can be found on the monitor or on the cover of this user manual)

FCC Caution:for Baby Monitor

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different

from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
