 5. When the Alarm is activated, the Alarm Symbol will turn on
 6. The setting mode will exit if there is no operation for 15 seconds
- *A2 and A3 alarm can be set in the same way as A1
*Alarm will ring for 1 minute at the set time, press any button to stop the alarm
*Please note the alarm symbol will stay on and will ring the next day at the same time unless deactivated in the alarm settings

Temperature Display

*After the power is turned on, the clock will automatically detect the current room temperature and update the temperature every 60 seconds
* Press the DOWN button for 3 seconds to switch between Celsius(°C) and Fahrenheit(°F)

OTHER FUNCTIONS

Voice Activation / Touch Feature

The Voice Activation feature will turn on the LED time and temperature reading when you make a noise (like a clap) or by touching the unit. Note this is a power saving mode that can be turned off if you want the display to show all the time

Display Modes

Under clock, calendar or temperature mode, press the UP button to switch between Dp-7, Dp-2 and dp-3 display modes

dp-1 mode: LED alternately displays time and date. Time will display for 10 seconds, date will display for 2 seconds. For example: press the UP button to enter the dp-1 Mode, after setting it return back to time display. Under display mode, the LED display will alternate in the following sequence -> time (10seconds)-> date(2seconds)

dp-2 mode: Press the UP button to enter the dp-2 mode, set your desired mode (Time, Date or Alarm) to keep this mode on the screen. For example Press the UP button to enter to the dp-2 mode, after settings are finished it return back to time display. If you always want to keep Time display showing, press the SET button to enter Time mode, the screen will keep Time display. If you always want to keep Date display showing, press the SET button to enter Date mode, the screen will keep the Date display. If you always want to keep Alarm display showing, press the SET button to enter Alarm mode, the screen will keep the Alarm display

dp-3 mode: Press the UP button to enter the dp-3 mode, under this mode, the screen default Time will always display after 15 seconds. For example, press the SET button to check Time->Date->Alarm as sequence, it will automatically return back to Time display after 15 seconds if there is no operation.

Power saving and Touch control mode

*The default mode is Sd (power saving off). Under Time Mode, press the DOWN key to turn on the Power Saving Mode. The clock will then display 'oN Sd'. Press the DOWN key again to turn off the Power Saving Mode. *Under Power Saving Mode, without any operation for 30 seconds, the LED display will automatically turn off. *Under Power Saving Mode, touch the LED clock or touch the table to turn on the LED display. *Under power saving Mode when alarm is ringing, the LED display will automatically turn on

Built in Time Memory

Built in CR2032 battery keeps the time running when power is off, but other functions cannot be used. If time memory doesn't work anymore, please replace the built in CR2032 battery behind the battery compartment

Specifications

- > Input: 5V 2A, 9V 1.5A
- > Output: 5V1A, 9V1A
- > Stand by Power: <0.2W
- > Charging Distance: 5-70 MM
- > Charging Effect: 75%
- > Charging Power: 10 W
- > Power Supply: USB 5V / 3*AAA battery case (battery not included) / button battery included for clock

Package contents

- Wireless Charging Alarm Clock x 1
- Micro USB Power Cable x 1

FCC Statement

This device complies with part 18 of the FCC Rules. Operation is Subject To the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and candidate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.

This device complies with Part 18 of the FCC Rules. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and any other radio device.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

ISED Statement

- English: This device complies with Industry Canada license - exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) This device must accept any interference, including interference that may cause undesired operation of the device. The digital apparatus complies with Canadian CAN ICES - 3

(B)/NMB - 3(B).

- French: Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This radio transmitter has been approved by Industry Canada to operate with the antenna types listed with the maximum permissible gain indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal. Les types d'antenne non inclus dans cette liste, et dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.
