## **5. Antenna Information**

### **5.1 Antenna Type**

Antenna connected using On-board PCB antenna.

### **5.2 Reduce Antenna Interference**

While using the On-board PCB antenna, in order to have the best Wi-Fi performance, it's recommended to keep a minimum 15mm distance between the antenna part and the other metal pieces.

User's own PCBA design is recommended NOT to pass any wire, NOT do copper pour under the region of the module's antenna, to avoid interferences.
