11 Troubleshooting

1. The first startup of Nitro Phablet 9S is slow

After the Nitro Phablet 9S system upgraded, the first startup need to install the pre-installed application software, the lead time is around 2-3 minutes, the startup afterwards will be much quicker.

2. Nitro Phablet 9S can’t connect to the Wi-Fi

- Make sure the wireless router of internet service is working
- Ensure the Nitro Phablet 9S and wireless router are in ranger of router,
- Ensure the user name and password both correct.

3. Nitro Phablet 9S feels hot

When many applicationsare running at the same time or the brightness of screen open to the lightest or under charging, Nitro Phablet 9S may feel warm/hot. It is normal.

4. Registration of application procedure.

- Ensure your internet is well connected.
- Keep your system time and local time consistent.

5. The system is abnormal and can’t work.

When you install some third party application procedure, it may cause abnormal work, you can press **Reset key(**next to power port) to reset the system.

6. The webpage can’t be opened

- Please keep the distance between from route to Nitro Phablet 9S in effective range.
- Please restart WIFI and try again.

7. Nitro Phablet 9S works terribly slow sometimes

Please close some application you don’t need in advanced task management, or uninstall some third-party application to release more system resource.

Warning

■Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause interference

(2) this device must accept any interference,including interference that may cause undesired operation of the device.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee taht interference will not occur in a particular installation If this equipment does cause harmful interference to radio or televsion reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet an a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

■SAR tests are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

■Before a new device is a available for sale to the public, it must be tested and certified to the FCCthat it does not exceed the exposure limit established by the FCC, Tests for each device are performed in positions and locations as required by the FCC.

■Non-compliance with the above restrictions may result in violation of RF exposure guidelines.

■ Tablet will be saled together with protective jacket.
Note: the Leather Sheath is part of the product,
it can't be separated from tablet.
