FCC ID: 2ANNATYHT

Product name: Smart Watch

Model No.: W101hero

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Exposure Information and Statement

The SAR values found for the Smart Watch are below the maximum recommended levels of 1.6W/Kg as averaged over any 1g tissue for Mouth-worn and 4.0W/Kg averaged over any 10g tissue for Wrist-worn as according to the KDB 447498 D01.

This Smart Watch with FCC ID: 2ANNATYHT has also been tested against this SAR limit. The highest values for Mouth-worn and Wrist-worn are 0.431 W/kg, and 1.763 W/kg respectively. This device was tested for Mouth-worn operations with the front of the watch kept 10mm from the mouth. In addition this device was tested for Wrist-worn operations with the back of the watch at 0mm distance to the wrist. The use of accessories (with or without metallic components) are not assumed to be used for watches, and shall therefore not be used.
