V Common Problem

Q: **Device display "Device is not online."**

A:1.Make sure the camera is powered on.
   2.Make sure the camera and your mobilephone are well connected
      to the network, and the DHCP function is enabled in your router.
   3.If the problem cannot be solved, suggest you hold down on the
      reset button for 3 seconds to re-configure wireless connection.

Q: **The device is online and alarm is triggered, but you don't
receive push message on your phone.**

A:1. Make sure the "AnniCam" APP is already running on the phone, and
      push alarm function is enabled.
   2. If you are using a phone with iOS system, please allow notification in
      "Settings" > "Notifications".
   3. Please disable and then enable alarm push function

Q: The device is online, but it prompts "the connection fail"

A: 1.Please make sure your mobile phone is well connected to the
      network. It requires good network bandwidth to preview video.
   2.Please refresh network a few times on your phone or replace to
      other network.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled enviroment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
