

The Microphone

How to connect microphone with Pa system?

- 1 Turn on the speaker and find the " INPUT " button;
- 2 Quickly short press the " INPUT " button for three times to enter into pairing status with a voice prompt " UHF is waiting for connection " ;
- 3 Switch on the wireless handheld MIC and twist off the shell; then press " △ " & " ▽ " at the same time for 3 seconds until screen "520.0" indicator flashes;
- 4 Please wait about 3 seconds until the signal indicator " 520.0 " on the handheld mic from flashing to keep long lights, at this time you could hear "UHF is connected" sound, it means the wireless mic pair successfully with the speaker.

Please noted:

- 1 Please finish pairing operation within 10s as the " 520.0 " indicator can only flashes about 10s;
- 2 Please operate in strict accordance with the above order. Do not reverse the order. If you do Step 3 before Step 2, then pair will fail.
- 3 Under the pairing status, long press " △ " & " ▽ " on the hand-held microphone to disconnect wireless signal with voice prompt " UHF is disconnected ". Please repeat step 2 & step 3 to repair.
- 4 Please remove the AA batteries inside the microphone in case of getting rot if you didn't use it for a long time .
- 5 If you got the double wireless microphone version,second microphone just copy step 2 & step 3 to connect with PA system.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
