

Thank you for choosing the wireless charger transmitter. This product is compatible with all Qi-integrated or Qi-ready smartphones as well as mobile devices with Qi-compatible receiver cases. You can simply place your phone on this device to charge your phone wirelessly at home or in the office. Before using the product, please read this User Guide carefully and follow the instructions for proper operation.

Product Introduction

This product is qualified to meet Qi international wireless charging standard. Unique intelligent ID charging: automatically identify different devices to adjust output power. All connections are non-exposed. And secure chips can prevent safety hazards such as electric leakage, voltage surge, short circuit etc. Product can be used to charging Qi enabled phones.

Quick Start Guide

- 1 Use micro USB cable and adapter or standard USB to supply power to the charger.
- 2 Slowly drop the phone to the charging area.
- 3 The charging starts automatically.

Notes:
Default input is DV 5V by adapter or standard USB plug-in. Due to current limit of USB ports, sometimes charging may restart during charging. Adapter 5V/2A is recommended.

Indicators

Red light: refers to standby mode or error.
Blue light: refers to normal charging mode.
Buzzer: it will beep once when the phone is placed in the correct position.

Warnings

To prevent harm and property loss, please read the following instruction carefully before use this product.

Indicating things:

- Warning! There are contents concerning the occurrence of wound and property damage.
- Attention! There are contents concerning the occurrence of property damage.
- Do not use in place of $< -10^{\circ}\text{C}$ or $> 50^{\circ}\text{C}$ temperature range. It may damage the product.
- Do not use in place where the sun shines directly or with high temperature. It may lead to the damage.
- Do not use in wet and duty places. It may lead to heat, fire and electric shock.
- Do not lay the product in places that are easy to fall.
- Do not put it into water or any other liquid, do not make it wet. It may leads to damage of the product.
- Do not dismantle!

Dismantling the product will cause irreversible damage.

Technical Specifications

5W Wireless Charger

Wireless Standard	Qi
Input	DC 5V \rightarrow 2A
Output	DC 5V \rightarrow 1A
Charging Frequency	110 to 205KHz
Charging Distance	4 to 8 mm
Conversion Efficiency	78% (Max)
Working Temperature	-10 $^{\circ}$ C to 50 $^{\circ}$ C
Storage Temperature	-20 $^{\circ}$ C to 85 $^{\circ}$ C

Troubleshooting

- To be charged wirelessly, your mobile device must be equipped with a Qi wireless receiver. Please visit www.up-mfg.com for a list of compatible devices and wireless receivers.
- For consistent performance, use a 5V, 2A USB power source and a 2A-capable micro USB cable. A USB port of a computer may not provide sufficient charging current for proper operation.
- For faster charging of your iPhone or iPad by wire, please use an original Apple Lightning cable or an MFI-certified Lightning cable (not included).
- The Qi wireless receiver may not be centered on some phones. The dual coil technology mitigates this issue by enlarging the charging area. However, for certain phones, you may need to change the orientation for optimal charging speed.
- During wireless charging, heat may be generated by the charger, receiver, and mobile phone. To reduce temperature, use only high-quality Qi wireless receivers and avoid using intensive applications on your phone (such as 3D games) during wireless charging.

Safety Information And Precautions

- The fast charging transmitter may generate heat when charging. Do not charge under pillows, blankets, or on amammable surfaces.
- Keep away from heat sources, direct sunlight, combustible gas, humidity, water, and other liquids.
- Do not disassemble, open, microwave, freeze, incinerate, paint or insert foreign objects into the power bank.
- Do not crush, bend or puncture. Avoid dropping or

- placing heavy objects on the power bank.
- Do not short-circuit the power bank or store it in a receptacle where it may be short-circuited by other metallic or conductive objects.
- Do not connect the transmitter to any improper voltage power source.
- Keep away from strong magnetic elds.
- Charging transmitter usage by children should be supervised.

Applications

This product is compatible with universal qi wireless charger standard. More and more companies are joining into set wireless charger transmitter in public places. People don't have to carry cable and adapters. Simple to charging for the phone.

Warranty Information

This product comes with a 1-Year Limited Manufacturer's Warranty to the original purchaser.
