

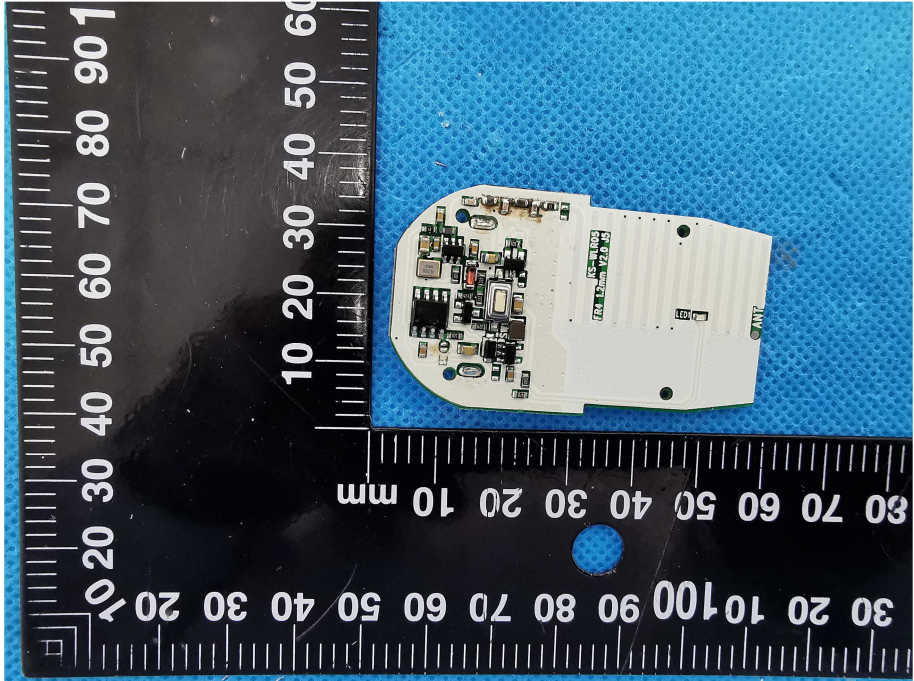

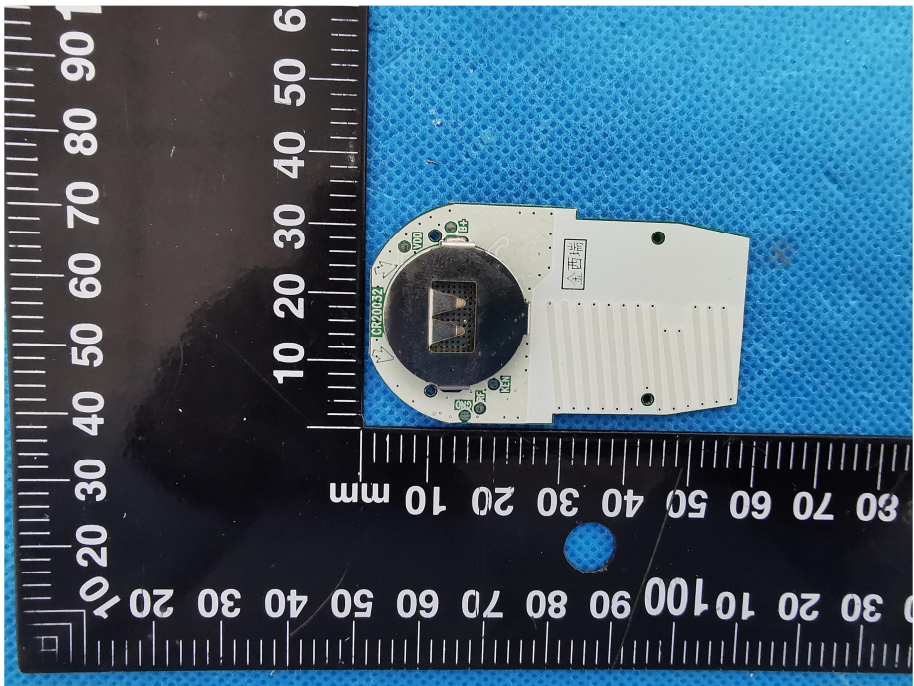

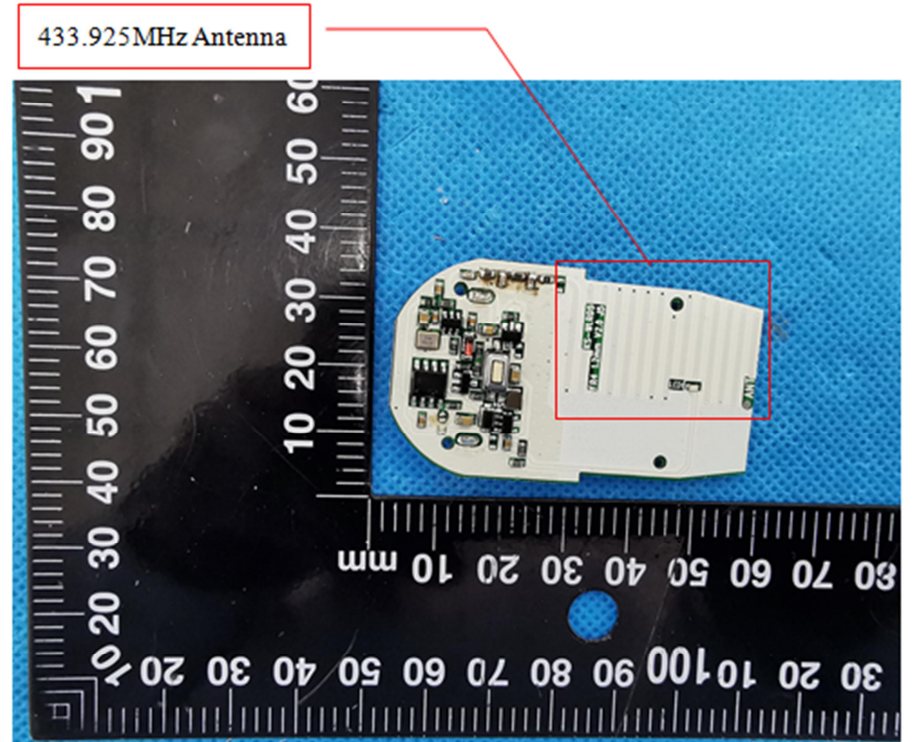

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>A photograph showing the disassembled EUT housing and board. The white plastic housing is split into two halves, with the internal printed circuit board (PCB) visible in the left half. The PCB is populated with various electronic components, including a microcontroller, capacitors, and connectors. A black ruler with white markings is placed horizontally and vertically around the components for scale. The background is a blue textured surface.</p>
<p>Solder Board-Component View 1</p>	 <p>A close-up photograph of the PCB components from the previous view. The components are soldered onto the board. A black ruler with white markings is placed horizontally and vertically around the components for scale. The background is a blue textured surface.</p>

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph showing the solder side of a white PCB component. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 60 mm. The solder side features a circular metal pad and various electronic components.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph showing the antenna side of the same white PCB component. A red box highlights a specific area on the component, and a red line points from a text label to this box. The text label reads "433.925MHz Antenna". The component is placed on a blue textured surface next to a black ruler with white markings, similar to the previous view.</p>
