

Radio Frequency Exposure Compliance

Electromagnetic Fields

Test Specification

Test standard : CFR47 FCC Part 2: Section 2.1093
FCC KDB Publication 447498 D01 v06

Measurement Record:

The minimum distance for the EUT is less than 5mm.

Since maximum peak output power of the transmitter is 3.90 dBm ≈ 2.45 mW $< \frac{3*d}{\sqrt{f}} = 9.60$ mW.

Hence the EUT is excluded from SAR evaluation according to FCC KDB Publication 447498 D01 General RF Exposure Guidance v06.
