Start Device

APP Download and Installation

Note: to download the 365SECUVR app, IOS system version should be IOS 7.0 or above, Android system version should be Android 4.0 or above.

1.Installaton on IOS/Android phone

Scan the RQ code as below and download the APP for free, or search "365SECUVR" on APP store and Google Play to download and install.

365SECU VR 2.Software Operation iOS

Android

There are "Local" and user mode on the software. Users without a registered account can click" Local" and try this APP.

Note:

•Data in "Local" will be stored at local, once and can't be restored.

•Log in mode: Data, such as the device added or grouped by users, are managed by server, which won't be lost even to delete all data on the cell phone. As long as users re-install the APP and log in the old account, all data will be restored for some auxiliary functions such as device status notification and alarm notification.

3.Registraton

Users without accounts have to take several seconds to register one.Click"I Need Register", enter an account and password(6 to 12 numbers or letters). Enter and bind the email address (system will send an email to the mail box). Get into the email box to click the link to complete registration(please follow this step,otherwise users can't get password back through emails).

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
