Contains FCC ID: X3ZBTMOD8
Contains IC: 8828A-MOD8

Standard FCC ID/IC label for FS200 & TS100

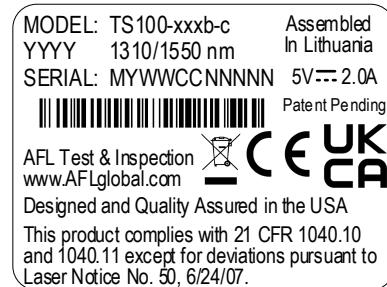

The above shows the location of the serial number/model type/CE/FDA certification label. This is the same location on both the FS200 and TS100.

The labels shown below are for the individual FS200 and TS100 models. Some of the FS200 labels show older models that are still in service, have the Bluetooth module and CC3200-based WiFi transceiver, though the installed firmware does not support the WiFi function. Enabling WiFi would require a firmware update.
