

Date 2/28/2018,

To who it may concern:

With reference to Sagrad SG901-1203 and to ST Microelectronics s.r.l. SPWF01Sx WiFi module, we confirm that they are based on the same hardware and functionality.

Since on these devices the real time clock is not a used function, on the SPWF01Sx the external 32768Hz crystal has been removed in order to reduce product cost and testing time.

Regards

Paolo Evangelista
Design and application manager
