Single Modular Approval. Power listed is maximum combined conducted output power. Compliance of this device in all final host configurations is the responsibility of the Grantee. This device is to be used only for mobile and fixed applications. The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20-cm from all persons and must not transmit simultaneously with any other antenna or transmitter, except as in accordance with FCC multi-transmitter product procedures. The antenna(s) used for this transmitter must not exceed a maximum gain of 2.5 dBi. OEM integrators must be provided with antenna installation instructions and labeling requirements for finished products. End-Users must be provided with transmitter operation conditions for satisfying RF exposure compliance. This grant is valid only when the device is sold to OEM integrators and the OEM integrators are instructed to ensure that the end user has no manual instructions to remove or install the device. Separate approval is required for all other operating configurations, including portable configurations with respect to 2.1093 and different antenna configurations. This device has a 20 and 40 MHz bandwidth mode. (Original Grant 02/03/2014) Class II Permissive Change: This Class II Permissive Change is to add the following antennas: LSR 2.5 dBi PIFA (P/Ns 001-0016 and 001-0021). This module can only be used with a host antenna circuit trace layout design in strict compliance with the OEM instructions provided.

CC: This device is certified pursuant to two different Part 15 rules sections.
