WARNING: DO NOT USE THE ABOVE TWO CHARGING METHODS SIMULTANEOUSLY.

Caution

- Risk of explosion, fire or chemical burns if battery is disassembled, crushed, stricken, trampled, short-circuited, incinerated or exposed to high temperature over 60°C.
- Don't use damaged or weeping battery.
- Keep the battery dry and out of Children's reach.
- Properly dispose of failure batteries in accordance with local regulations.
- Although your device is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting or bending, or sitting on it.
- Make sure the charger/USB port, microSD card/SIM card slot covers are properly seated, with no foreign objects obstructing the seals.
- Do not use the charger/USB port for charging, data transmission, etc. until the phone is completely dry.
- Do not store the device under any circumstance containing electronic erosive material.
- Avoid to pull the device up by holding the antenna or accessories.
- Please power off and unload the battery before cleaning the device.
- Using dry and clean lint-free cloth or hairbrush to keep the device and charger docking port clean.
- Avoid to use any chemical agent including detergent, alcohol, aerosol spray or oil preparations as cleaning solution.
- Dry your device completely after cleaning and before using it again.

Emergency call

If any emergency arises, dial 112/911 (or other emergency call number) for emergency help.

Due to the nature of cellular networking, the success of emergency call is not guaranteed.

FCC Warning:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types TE580P (FCC ID: 2ANY6-TE580P) has also been tested against this SAR limit. The highest reported SAR values for head, body-worn accessory are 1.06 W/kg, 0.88 W/kg respectively. The Max simultaneous SAR is 1.43 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

5G

For 5150-5250 and 5725-5850 frequency band,

Operations in the 5150-5250 and 5725-5850 band are restricted to indoor usage only.

5G:

Any emission is maintained within the band of operation under all conditions of normal operation. The max. frequency stability is less than 20ppm.
