charging

- Full charge requires approximately 1.5-2.5 hours
- Charging is complete when red light turns off
- Plug micro end of charger into headphones
- Plug USB end of charging cable into a computer or 5V DC USB power supply

aux/line in

- Insert 3.5mm audio cable into headphone AUX port
- Insert opposite end of audio cable into the music source

troubleshooting

- If the headphones are not working correctly, turn them on/off to reset
- If the headphones won't turn on, recharge the battery and try again
- If the headphones won't charge, make sure the supply works, is 5V-1A, and not damaged
- If the headphones make no sound or do not show as an available device, make sure they are not paired to a different device already.

FCC ID: 2A023-BTH10 Model: BTH10 Input: 5V Max 1A Made in China
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept interference received, including interference that may cause undesired operation. Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
