

Mobile Phone Quick Guide

Instructions.

Thank you for purchasing this product. For your cellular phone to work properly, please follow the instructions in the manual. To prevent any possible incidents or malfunction, please follow all safety warnings. If the function upgrade described in the manual content does not agree with your actual products, please refer to our company subsequent release of information.

For Your Safety

General Safety

	Don't make or receive handheld calls while driving. And never text while driving.		Don't use at petrol stations.
	Keep your phone at least 10 mm away from your ear or body while making calls.		Your phone may produce a bright or flashing light.
	Do not leave your phone and its accessories within the reach of small children or allow them to play with it. Small parts may cause a choking.		Don't dispose of your phone in fire.
	Your phone can produce a loud sound.		Avoid contacting with anything magnetic.

	<p>Keep away from pacemakers and other electronic medical devices.</p>		<p>The phone's normal operating temperature is -10°C ~ 50°C .In order to ensure the normal phone functions, do not use this phone outside the temperature range</p>
	<p>Switch off when asked to in hospitals and medical facilities.</p>		<p>Avoid contacting with liquids. Keep your phone dry.</p>
	<p>Switch off when told to in aircrafts and airports.</p>		<p>Don't take your phone apart.</p>
	<p>Switch off when near explosive materials or liquids.</p>		<p>Only use approved accessories.</p>
	<p>Don't rely on your phone for emergency communications.</p>		<p>To prevent possible hearing damage, do not listen at high volume levels for long periods.</p>

Product Handling

General Statement on Handling and Use

You alone are responsible for how you use your phone and any consequences of its use.

You must always switch off your phone wherever the use of a phone is prohibited. Use of your phone is subject to safety measures designed to protect users and their environment.

- Always treat your phone and its accessories with care and keep it in a clean and dust-free place.
- Do not expose your phone or its accessories to open flames or lit tobacco products.
- Do not expose your phone or its accessories to liquid, moisture or high humidity.
- Do not drop, throw or try to bend your phone or its accessories.
- Do not use harsh chemicals, cleaning solvents, or aerosols to clean the device or its accessories.
- Do not paint your phone or its accessories.
- Do not attempt to disassemble your phone or its accessories, only authorized personnel can do so.
- Please check local regulations for disposal of electronic products.
- Do not carry your phone in your back pocket as it could break when you sit down.
- Use careful with the earphone maybe possible excessive sound pressure from earphones and headphones can cause hearing loss.
- **Adapter** : adapter shall be installed near the equipment and shall be easily accessible.

- **CAUTION** : RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Electrostatic Discharge (ESD)

Do not touch the SIM card's metal connectors.

Antenna

Do not touch the antenna unnecessarily.

Normal Use Position

When placing or receiving a phone call, hold your phone to your ear, with the bottom towards your mouth.

Phone Heating

Your phone may become warm during charging and during normal use.

Getting Started

Overview

- 1、Headphone insertion hole
- 3、Receiver
- 5、Up volume button
- 7、Power
- 9、Microphone
- 11、Rear flash

- 2、Front camera
- 4、Light/Proximity sensor
- 6、Down volume button
- 8、Data port
- 10、Rear camera
- 12、Speaker

Keys Explained

Key	Function
Power Key	<ul style="list-style-type: none">• Hold to switch audio profiles, or to turn on or off Airplane mode, or to power off.• Press to switch your phone to Sleep mode.• Press to wake up your phone.
Home Key	Press to return to the Home Screen from any application or screen.
Menu Key	Press to get the options for the current screen.
Back Key	Press to go to the previous screen.
Volume Keys	Press or hold to turn the volume up or down.

Install the SIM card / SD card

1. To ensure that the phone off, use the card to take out the card care;
2. Insert the Nano-SIM card and the Micro SD card as instructed on the card

Charging the Battery

When you first get your new phone you'll need to charge the battery.

1. Connect the adapter to the charger jack. Ensure that the adapter is inserted with the correct orientation. Do not force the connector into the charger jack.
2. Connect the charger to a standard AC wall outlet.
3. Disconnect the charger when the battery is fully charged.

Switching Your Phone On/Off

Make sure the SIM card is in your device and the battery is charged.

- Hold **Power Key** to switch on your phone.
- To switch it off, hold **Power Key** to get the phone options. Select **Power off**, and then tap **OK**.

Waking Up Your Phone

1. Press the power key to activate the screen display.
2. Drag the main screen to the right to unlock the screen.
3. Slide the camera up to go to the camera application.

NOTE: If you have set an unlock pattern, PIN or password for your phone (see chapter *Sorting out Your Phone Settings – Security Settings*) you'll need to draw the pattern or enter the PIN/password to unlock your screen.

Getting Around Your Phone

Home Screen

In the Home screen, besides the shortcut icon is displayed, you can also set your own wallpaper, add the widgets or application shortcuts you need, or remove them as you like.

Choosing Your Wallpaper

1. Press **Home Key** to return to the Home Screen.
2. Tap **Menu Key** and select **WALLPAPERS**.
3. Choose the image or animation you want to use as the wallpaper. Some cropping may be needed for Gallery images.
4. Tap **Set wallpaper**.

Use the phone as a USB memory

1. Connect the phone and computer with the USB cable.
2. In the drop-down notification bar, tap **Charge via USB for this device**, select **Transfer File**.

Turning On Wi-Fi

1. Press **Home key** > tap > **Settings**.
2. Click next to the Wi-Fi menu to turn it on, click you can turn off the Wi-Fi function.

Turning On Data Services

Press **Home key** > tap **Settings** > **SIM management** > **Data connection**, then tap **ON/Off**.

HAC warning

US Information Concerning the Federal Communications Commission (“FCC”) Requirements for Hearing Aid Compatibility with Wireless Devices When wireless devices are used near hearing devices (such as hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference, and wireless devices also vary in the amount of interference that they generate.

The wireless telephone industry has developed ratings to assist hearing device users in finding wireless devices that may be compatible with their hearing devices. Not all wireless devices have been rated. Wireless devices that are rated will have the rating displayed on the box together with other relevant approval markings.

The ratings are not guarantees. Results will vary depending on the user’s hearing device and hearing loss. If your hearing device is vulnerable to interference, you may not be able to use a rated wireless device successfully.

Consulting with your hearing health professional and testing the wireless device with your hearing device is the best way to evaluate it for your personal needs.

This smartphone has been tested and rated for use with hearing aids for some of the wireless technologies that the smartphone uses. However, other wireless

technologies may be used in this smartphone that have not been tested for use with hearing aids. It is important to try the different features of your smartphone thoroughly and in different locations to determine if you hear any interfering noise when using this smartphone with your hearing aid or cochlear implant. Consult your wireless service provider about its return and exchange policies, and for information about hearing aid compatibility.

Hearing aid compatibility rating for this smartphone: M4/T4.

How the ratings work

M-Ratings: Wireless devices rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than wireless devices that are not labeled. M4 is the better or higher of the two ratings.

T-Ratings: Wireless devices rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated wireless devices. T4 is the better or higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Hearing devices may also be measured for immunity to this type of interference. Your hearing device manufacturer or hearing health professional may help you find results for your hearing device. The more

immune your hearing aid is, the less likely you are to experience interference noise from wireless devices. For more information about the actions that the FCC has taken with regard to hearing aid compatibility with wireless devices and other steps that the FCC has taken to ensure that individuals with disabilities have access to telecommunications services, visit www.fcc.gov/cgb/dro.

- a) Section 20.19(f)(1): an explanation of the ANSI C63.19 rating system.
- b) Section 20.91(f)(3): disclosure statement for HAC-rated handsets operating over the GSM air interface in the 1900 MHz band with a user-selectable mode or a special mode necessary to meet the hearing aid compatibility standard for reducing the power under the provisions of Section 20.19(c)(1).

IEEE1725 WARNING

- a) Do not disassemble or open crush, bend or deform, puncture or shred
- b) Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- c) Only use the battery for the system for which it is specified
- d) Only use the battery with a charging system that has been qualified with the

system per CTIA Certification Requirements for Battery System Compliance to IEEE

1 725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.

e) Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.

f) Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard. Only authorized service providers shall replace battery. (If the battery is non-user replaceable).

g) Promptly dispose of used batteries in accordance with local regulations

h) Battery usage by children should be supervised.

j) Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.

k) Improper battery use may result in a fire, explosion or other hazard.

Exposure to radio frequency signals

The smart phone radio is a low-power radio transmitter and receiver. It is designed to comply with the following:

- Federal Communications Commission (FCC) guidelines and limits
- Other relevant international guidelines regarding safety levels of radio frequency exposure for wireless devices

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit

different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules and Innovation, Science and Economic Development Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The portable device is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA). These requirements set a SAR limit of 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use when properly worn on the body.

The highest SAR value :Head 0.56W/kg ;Body-worn 0.75 W/kg

The National Council on Radiation Protection and Measurements (NCRP)10

To maintain compliance with radio frequency exposure guidelines and limits, keep the smartphone at least 10 mm away from your body. When you carry the smartphone on your body, use only accessories equipped with an integrated belt clip that are supplied or approved by the manufacturer. If you use a body-worn accessory not supplied by the manufacturer, verify that the accessory does not contain metal and keep the smartphone at least 10mm from your body.
