

Smart Phone & PC Keyboard/Video/Mouse Switch

KVM-BT250

Thank you for your choice of this product. Most people had tough operating experience due to Smart Phone small screen size and inconvenient software keyboard. By this product, you can easily share your current computer peripheral equipment (like computer LCD screen, USB keyboard and mouse) at home or office with your Smart Phone/Tablet devices. Just one touch (Alt+F2) on USB keyboard to switch Smart Phone screen to LCD, and the same one USB keyboard and mouse can be used by Smart Phone. Then, just 1 touch (Alt+F1) to switch PC screen back to LCD, and the same one Keyboard and Mouse can be used by PC.

LED Light Status

- **1** Red light will be on after switching to PC
- Green light will be on after switching to Smart Phone

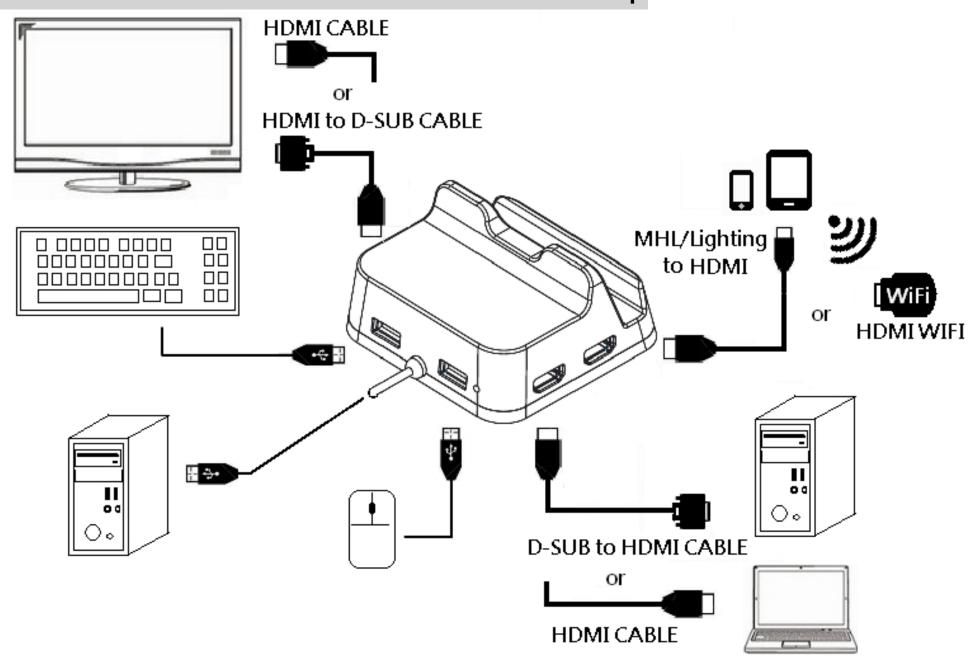

*Blue light will be constant on when making BT connection, will flash slowly when making BT disconnection, and will flash fast when putting BT into pairing status.

Bluetooth Function Description

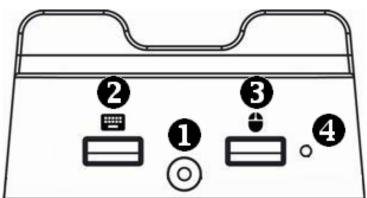

The Bluetooth status for the first time use is waiting for pairing status, and the blue light fast flashes. After well connected with Smart Phone, the blue light will become constant light. This product has Bluetooth memory for linking back function. Once the product detects Smart Phone which has been paired before, it will reconnect automatically. You do not have to reconnect Bluetooth every time.

(Important!) Before you want to connect this product by another Smart Phone, please put Bluetooth into waiting for pairing mode again. You just use a pen point to gently press a small hole behind the product, or just press Alt on keyboard; now, the blue light is fast flashing, and you can use another Smart Phone to connect this product.

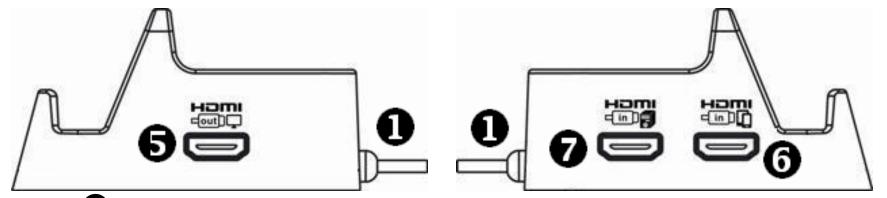

Demonstration of Production Environment Setup
