

M5 Plus

Smart phone 5.5"

Gracias por comprar este producto Tech Pad, esperamos disfrute su uso.

Por favor lea las instrucciones antes de operar su Smartphone y conserve este manual de operaciones.

El contenido de este manual puede diferir en ciertos aspectos de la descripción de su teléfono en función de su versión de software y de su operador telefónico.

Conozca su smartphone

How to use the keys of the telephone

In any screen:

Touch to return to the previous screen or to leave the application.

Touch to return to the main menu.

Touch to show/to clean the recent applications.

It touches the Ignited button "/Extinguished" to ignite and to extinguish the screen and to block

Language

Touch the icon of adjustments, later slipping downwards and touches to the option “Language

The icon does

a call Pressing “People”, email, message or any telephone number of on the telephone you will be able to make a call. Also the numeric keypad in the application can do a call using “Telephone”.

To send Messages

Presses the icon “Messages” to send a message to another person. The name telephone number in the entrance field enters. Also it can choose somebody of the list of contacts, later presses “To send” the written message. It can press button “+” if it wishes to send an image.

To enter and to publish text

This smartphone will give recommendations him when this entering some text. If it wants to publish some single text selecciónelo and presiónelo by some seconds, later it moves the cursor or it uses the selector to cut or to copy the text.

Camera

records colorful moments Presses the icon to open the application. This smartphone supports a variety of ways of scene like Beauty, HDR, Panorama, detection of smile.

Camera

keeps beautiful memories Presses the icon to open the application, now presses the icon of in order to make a recording of video.

Benefit colorful photographs

Presses the icon "Gallery" to open the application. Here it will be able to look for all the photographs and videos that volume previously. The icon can publish a photography when touching, can trim, fit the color, apply effects, etc.

To send post office Gmail

Presione the icon "Gmail" to open the application. After making the account adjustments you will be able to send and to receive electronic mails in his smartphone. At any time maintain communication with friends and clients and place.

Google Play Music

Presione the icon "Google Play Music" to open the application. You will be able to reproduce songs by artist, album, song among other options.

*Pueden aplicar cargos de uso.

ENGINEERING SPECIFICATIONS:

TECH PAD M5 Plus

CPU: MTK6580 QUAD CORE

SO: ANDROID™ 7.0

RAM: 1GB

MEMORIA: 16 GB INTERNA / MICRO SD: HASTA 64 GB (EXTERNA).

PUERTOS: MICRO USB 2.0 / TARJETA MICRO SD / JACK 3.5MM.

CONEXIONES INALAMBRICAS: WIFI (802.11 B/G/N) / BLUETOOTH / GPS

OTROS: LECTOR DE HUELLAS / DUAL SIM (1 SIM 3G + 1 SIM 2G)

CAMARA: FRONTAL, 5.0 MEGA PÍXELES / TRASERA, 13.0 MEGA PÍXELES

CAMARAS OPTIMIZED BY SOFTWARE

DISPLAY: 5.5" HD IPS FORMATO 18:9

REDES: 3G: WCDMA 850/1900 / 2G: GSM 850/1900

BATERÍA: RECARGABLE 3000MAH / 5V - 1.0 A

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with

the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These

limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power

output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.336W/Kg and when worn on the body, as described in this user guide, is 0.870W/Kg(Body - worn measurements differ among phone models, depending upon available accessories and FCC requirements). The maximum scaled SAR in hotspot mode is 1.429W/Kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RFexposure guidelines. SAR information on this model phone is on file with the FCC and can be

found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: 2AOC2-M5PLUS additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body - worn Operation

This device was tested for typical body - worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third - party

belt - clips, holsters, and similar accessories used by this device should not contain any metallic components. Body - worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
