eufy Lumos Smart Bulb 2.0

Model No.: T1015

Installing Lumos Smart Bulb

💡 Make sure the power switch controlling Lumos is turned off before installing.

⚠️ When the bulb is turned on, it will become hot as light is emitted. To avoid burning your hands, do not touch the bulb. Do not touch the bulb immediately after turning it off.

Downloading the EufyHome App

What you need:

- A Wi-Fi router supporting the 2.4 GHz and 802.11 b/g/n bands; the 5 GHz band is not supported.
- A smartphone or tablet connected to a Wi-Fi network.
- A smartphone or tablet running iOS 8.0 (or above) or Android 4.3 (or above).

Download on the **App Store**

EufyHome

GET IT ON **Google Play**

Download the EufyHome app from the App Store (iOS devices) or Google Play (Android devices).

Connecting to a Wi-Fi Network

Note: Before starting Wi-Fi setup, make sure Lumos is turned on and blinks.

1 For first time users, create a new account in the EufyHome app.

2 Find "Smart Bulbs" in the device list and add it to your EufyHome account.

3 Follow the on-screen instructions to complete setup.

oufy
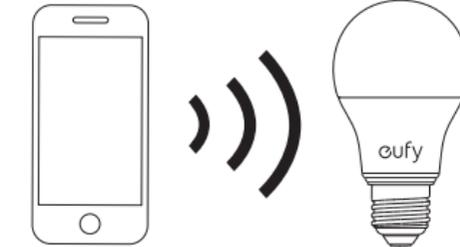

💡 - Make sure your smart device has already connected to your home network.
- The instructions in this manual are for your reference only. The app will be updated from time to time. Always follow the instructions in the app to complete Wi-Fi setup.

Using Lumos with the EufyHome App

📶	Control Lumos remotely.
💡	Adjust the brightness of the bulb(s).
☀️	Select White Mode (T1016) Adjust the color temperature from warm white to cool white.
⏰	Set schedules for Lumos.
🏠	Enable Away Mode Lumos will randomly turn on and off during the set period of time.
💡	Add and manage groups of bulbs This feature is only available for same-model bulbs.
👥	Enable multiple users to control Lumos Lumos allows any member of the household to control the light. You just need to get the owner's permission in the app.

Using Lumos with Amazon Alexa / the Google Assistant (Optional)

Before you start, make sure that:

- Lumos is connected with the eufyHome app.

- You have an Alexa-enabled device (i.e. Eufy Genie, Amazon Echo, Echo Dot, Amazon Tap, etc) or a device enabled with the Google Assistant (i.e. Google Home). These devices are sold separately.
- The Amazon Alexa app or the Google Home app is already installed on your smart device, and you have created an account.

💡 Actual usage may be different from the instructions in this user manual due to updates of the Amazon Alexa and/or the Google Home app. Always follow the instructions in this app to connect to Lumos.

To control Lumos with Amazon Alexa:

1 Open the Alexa app and select "Skills" from the ☰ menu.

2 On the Skills screen, search for "EufyHome".

3 Once you have found the "EufyHome" skill, tap **Enable**.

4 Login with your EufyHome account so that Alexa can control your Lumos.

5 Discover new smart devices via the "Smart Home" menu in the Alexa app or Alexa voice control.

➤ Once the device is found, you can control Lumos with your voice.

6 Say simple commands to Alexa. Below are some examples:

Note: The default device name is "My Smart Bulb". You can modify the device's name in the EufyHome app.

"Alexa, turn on My Smart Bulb."

"Alexa, set My Smart Bulb to 70 percent brightness."
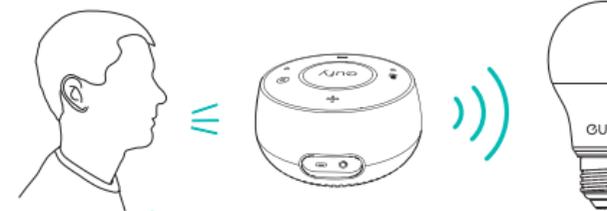

"Alexa, dim My Smart Bulb."

"Alexa, set My Smart Bulb to daylight."

To control Lumos with the Google Assistant:

Lumos now works with the Google Assistant on devices like the Google Home.

1 Open the Google Home app.

2 From the menu of the Google Home app, tap **Home Control**. If you cannot find **Home Control**, upgrade your app to the latest version.

3 Tap the "+" icon in the Device List and then select "EufyHome".

4 Follow the instructions in the Google Home app to authorize the Google Assitant with your EufyHome account.

5 After successful configuration, say simple commands to the Google Assistant to control Lumos with your voice.

Note: You can modify your device name in either the EufyHome app or the Google Home app.

"Ok Google, turn on My Smart Bulb."

"Ok Google, set My Smart Bulb to 70 percent brightness."

oufy
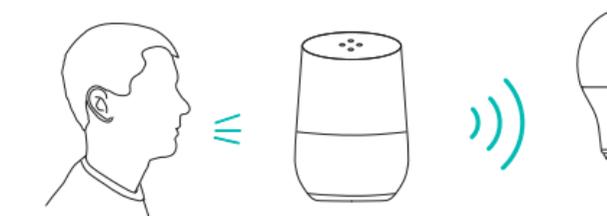

"Ok Google, dim My Smart Bulb."

"Ok Google, set My Smart Bulb to daylight."

Troubleshooting

1. Cannot connect to your Wi-Fi network.
- Make sure you are connecting Lumos to a 2.4GHz wireless network.
- Check if you have entered the correct Wi-Fi password during Wi-Fi setup.

2. Cannot connect to your Wi-Fi network.
- Make sure you are connecting Lumos to a 2.4GHz wireless network.
- Check if you have entered the correct Wi-Fi password during Wi-Fi setup.
- Check if there are any Internet connection problems. If the Wi-Fi signal is too weak, try to place your wireless router closer to Lumos and try again.

3. How to reset the Wi-Fi connection for Lumos.
- Turn Lumos smart bulb off and on five times in a row until the smart bulb blinks. Then you can reset the Wi-Fi connection for Lumos.

4. No response when using Lumos with the EufyHome app.
- Check if Lumos is turned off. If yes, turn it on and wait until Lumos reconnects with the Wi-Fi network automatically.
- Check if there are any Internet problems. If necessary, reset your wireless router and try again.

- If your smart device is connected to a 3G or 4G mobile network, check to see if the mobile network's signal is abnormal. Try again when the signal is stable.

5. Cannot control Lumos with Alexa voice control.
- Check if you have installed the Alexa app onto your smart device and enabled the "EufyHome" Skill in the Alexa app. For details, refer to the **Using Lumos with Amazon Alexa / the Google Assistant (Optional)** section of this manual.
- Check if you are using the proper commands when talking to Alexa. You must say the wake word "Alexa" first when making your request.
- Repeat your question. Speak clearly to Alexa.
- Make sure Lumos is at least eight inches away from walls or other objects that may cause interference (such as microwave ovens).
- Check if there are any Internet connection problems.

6. Cannot control Lumos with the Google Assistant voice control.
- Check if there are any Internet connection problems.
- Check if you have installed the Google Home app onto your smart device and enabled the "EufyHome" Skill in the Google Home app. For details, refer to the **Using Lumos with Amazon Alexa / the Google Assistant (Optional)** section of this manual.

- Check if you are using the proper commands when talking to the Google Assistant. When making your request, first say the wake words "Ok Google".
- Repeat your question. Speak clearly to the Google Assistant.
- Check if you have modified the name of Lumos in the EufyHome app. If yes, unlink your EufyHome account from the Google Home app and then relink.

Important Safety Instructions

Read and follow all the safety instructions:
- This device is for indoor use only.
- This device should not be exposed to dripping or splashing water.
- This device uses a non-replaceable light source. When the light source reaches the end of its life cycle, this device should be replaced.
- This device should only be installed by adults. Children should not install this device.
- Do not install near any heat sources.
- Do not use this device with dimmers.
- Do not place any sources of danger on this device (e.g. liquid filled objects, lighted candles).
- Do not use this device in totally enclosed luminaires. Use this device in open luminaires only.

- Do not use this device in emergency exits.
- If this device is much heavier than the lamp to be replaced, the increased weight may reduce the mechanical stability of certain luminaires and lampholders and may impair contact making and lamp retention.
- If this device is heavier than the lamp to be replaced, the added weight of this device may cause instability of a freestanding portable luminaire.
- When using this device in the portable table luminaire, the luminaire should be provided with a shade.
- RISK OF ELECTRIC SHOCK: USE IN DRY LOCATIONS ONLY. Do not install this device with wet hands.

Notice

This symbol means the product must not be discarded as household waste, and should be delivered to an appropriate collection facility for recycling. Proper disposal and recycling helps protect natural resources, human health and the environment. For more information on disposal and recycling of this product, contact your local municipality, disposal service, or the shop where you bought this product.

FCC Statement
1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

FCC Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body.
